MAZU is more than a brand,
it is ***Crafted for Generations.***

A refined fusion of Tank, Clipper and Strelitzia, Andalusia

Our in-house team creates a unique collection of planters that combines sophisticated design with high-end LED lighting, seamlessly integrated around the top rim to elegantly illuminate your tree or plant. These innovative planters are available in six distinctive designs, each offered in various sizes.

Not only do these planters elevate the beauty of your greenery, they also provide functional lighting, making them a captivating focal point for any indoor or outdoor setting. The true essence of this concept lies in its seamless fusion of architecture, horticulture and technology, delivering both aesthetic appeal and practical functionality in a single elegant solution.

Transform your spaces - indoors or outdoors - into brighter, greener, and more enchanting environments with MAZU planters.

ARCHITECTURAL PLANTERS

LUXURY PLANTERS

Collection crafted from powder-coated aluminium, **available with or without integrated lighting.**

Our architectural planters in aluminium combine beauty with brilliance. Crafted from high-grade, lightweight aluminium, they are exceptionally easy to handle - ideal for rooftops, balconies or places where weight matters.

All our curated components are thoughtfully selected with nature in mind and made from 100% recycled materials.

Finished with a sustainable, eco-friendly marine grade powder coating, they're not just gorgeous -they're **built to last**. The coating provides a smooth, modern finish while also protecting the surface from rust, corrosion and harsh weather.

Unlike traditional materials, aluminium won't degrade over time, making it the smart choice for both indoor and outdoor spaces.

PREMIUM PLANTERS

Collection crafted from architectural-grade CortenSteel, **available with or without integrated lighting.**

Our architectural planters in CortenSteel are all about timeless strength and natural beauty. We use premium-grade CortenSteel that forms a self-protecting rusted patina, no painting or treatment needed. This weathered look only gets better with age, while offering unmatched durability.

Why CortenSteel is the ultimate choice for outdoor design?

When it comes to outdoor planters that combine durability with design, nothing compares to CortenSteel. This remarkable material requires no coatings nor finishes, making it not only low-maintenance but also easier to work with during production.

CortenSteel is more than just practical. It’s sustainable, incredibly strong and effortlessly stylish. Over time, it forms a natural patina that protects it from the elements while giving it a warm and earthy finish that only gets better with age.

Built to last a lifetime - even in the harshest outdoor environments - CortenSteel planters are the perfect blend of **form and function.** Whether you're designing for a public space or your private oasis, they deliver timeless appeal with unmatched resilience.

LUMINOR LIGHTING

collection made of **powdercoated aluminium**

Our ambient planters are conceived as architectural elements, defined by precision, proportion and material quality. What sets them apart is the integrated LED uplighting, a standard feature that elevates each planter beyond its sculptural form.

Light is not an addition, but an essential part of the design bringing depth and focus to greenery through subtle, integrated light. Building on this concept, we have developed a new modular design: **the LUMINOR ring that can be positioned around existing trees.** The system allows for variation in height, enabling designers to integrate mature landscapes while introducing a clear and structured presence.

The modular construction offers flexibility across private, hospitality and public spaces, while maintaining a consistent high-end aesthetic. Each configuration is designed to integrate seamlessly with existing trees, reinforcing contemporary outdoor architecture.

For added versatility, also **planters supplied without integrated lighting** can easily be **upgraded** with the LUMINOR ring. This ensures continuity across projects, allowing light to be introduced at any stage while preserving the distinctive character that defines our MAZU collection.

Luminor by day, Copenhagen

Luminor by night, Copenhagen

Our benches are designed to be combined seamlessly with the TANK and WEDGE luxury or premium planter collections, sharing the same architectural proportions and refined material language. This ensures a cohesive visual identity across planting, lighting, and seating elements.

Crafted from high-quality wood and premium outdoor fabrics, the benches are built for long-term outdoor use. The materials are selected for durability, comfort, and resistance to weather, while maintaining a clean, high-end appearance.
Fully compatible with the TANK and WEDGE planters, the benches can be combined to create unified seating and planting arrangements. A considered solution that adds comfort and functionality, while preserving the clarity and elegance of the overall design.

SIGNATURE SEATING

COLLECTION **CLIPPER**

The wooden benches come in three sizes and are designed to offer flexible arrangements: either three identical benches placed around a single planter or a mix of bench sizes combined with planters of varying sizes.

At MAZU, we create trees that blend natural beauty with effortless living.

Each piece begins with a real, carefully selected trunk - sourced from a tree that has naturally reached the end of its life. We preserve and treat this wood to maintain its character, giving it a second life in a refined and sustainable way. This authentic base makes every tree truly one of a kind.

We then add artificial leaves by hand in Belgium, shaping each canopy with precision and care. The result is a tree that looks beautifully natural in every detail, yet requires no maintenance. Designed for both indoor and outdoor spaces, each tree brings calm, balance, and understated luxury. Crafted from preserved natural wood and handcrafted foliage, MAZU offers a timeless, sustainable, and effortless green presence.

Wedge and Monstera, Knokke

At the MAZU company, we have the resources and expertise to create custom projects tailored to individual needs. Whether you envision a unique design for your garden, terrace, or indoor space, we can bring your ideas to life with our bespoke designs and exceptional craftsmanship.

Let us help you craft a personalized, stunning focal point that perfectly complements your style and enhances any environment, indoors or outdoors. With MAZU, your space will express elegance and individuality.

Contact us today for a quote and let us turn your vision into reality, info@thisismazu.com.

CUSTOM PROJECTS

We offer dedicated in-house design expertise, working closely with you to translate ideas into thoughtful, refined solutions. Our team collaborates at every stage of the process, ensuring each project reflects your vision while meeting the highest standards of design and craftsmanship.

Customization can be as subtle or as transformative as you need. From small adjustments such as logo integration, color adaptations or material selections to the development of entirely new tailor-made concepts. We approach every request with the same level of care and attention to detail.

Whether you arrive with a fully formed concept or seek creative direction from the ground up, our designers are equipped to guide the process seamlessly. Supported by a strong network of trusted partners, we deliver complete A-to-Z solutions, bringing clarity, quality and coherence to every project.

Together, we create results that are both distinctive and enduring.

TECHNICAL INFORMATION
AMBIENT PLANTERS

Every MAZU planter includes a 9 cm clearance, making it fully compatible with our custom MAZU wheels. Wheels can be added to the large and extra large models, offering flexibility and ease of movement.

To protect your plants in extreme temperatures - above 40°C or below -10°C - each planter comes with a complimentary 3 cm thick high-performance outdoor foam insert. This insulation layer sits inside the planter flush against the walls, helping to shield roots from intense heat or deep frost with no extra effort.

All MAZU planters are designed to work naturally with standard irrigation systems, ensuring consistent hydration without the need for daily watering or guesswork.
A simple and smart solution for thriving plants in any season.

Crafted for Generations, Antwerp

TECHNICAL INFORMATION
LED LUMINAIRE

Technical Specifications for outdoor **LED luminaire:**

High efficiency: Top bend led neon light, with specifications 140LED/m, 14.4W/m, DC24V; 2700K, CRI>85; 50mm/unit, beam angle 270°.

Weatherproof: Rated IP65 for protection against dust and water ingress.

Long lifespan: Provides over 50,000 hours of operation, reducing maintenance costs and 5 year warranty.

Wide operating temperature range: functions effectively between -40°C to +50°C.

Hardwired dimmable LED line.

Dimmable LED driver 5 in 1 rated IP67: input voltage of 100-240V at 50/60Hz, delivering a 24V output voltage with a maximum output current of 6.25A.

TECHNICAL INFORMATION
POWDER COATING

We use premium European recycled aluminium known for its superior quality, ensuring durability and a sleek finish. The aluminium is coated with eco-friendly powder from Sherwin-Williams, offering both an environmentally conscious solution and a high-performance, long-lasting finish for our decorative projects.

Eco Powdura is a specific line of powder coatings developed by Sherwin-Williams, designed to meet diverse industrial and commercial applications. While powder coating in general refers to a finishing process that involves applying a dry, electrostatically charged powder to a surface and curing it with heat, Eco Powdura stands out due to several unique features and benefits:

- Enhanced durability
- Sustainability
- Innovative technologies

While generic powder coatings may suffice for standard needs, Eco Powdura offers specialized options and ensures consistency, longevity, and compliance with industry-specific requirements.
