

Ginkgo

DESIGN: Stone Designs 2014

BLÅ STATION

In Japan, the ginkgo tree is venerated. Several ginkgo trees survived the atomic bomb and continue to live today. For this reason, the trees are considered a "bearer of hope" and a symbol of resilience and peace on the island nation. Ginkgo brings a traditional Japanese pattern into a beautiful and very useful acoustic panel.

Ginkgo can bring the most amazing landscapes from all over the world into your indoor environment. Ginkgo can be a cloudy sky in the winter or a colourful forest during the autumn. By just changing the colours, this simple shape can bring millions of opportunity.

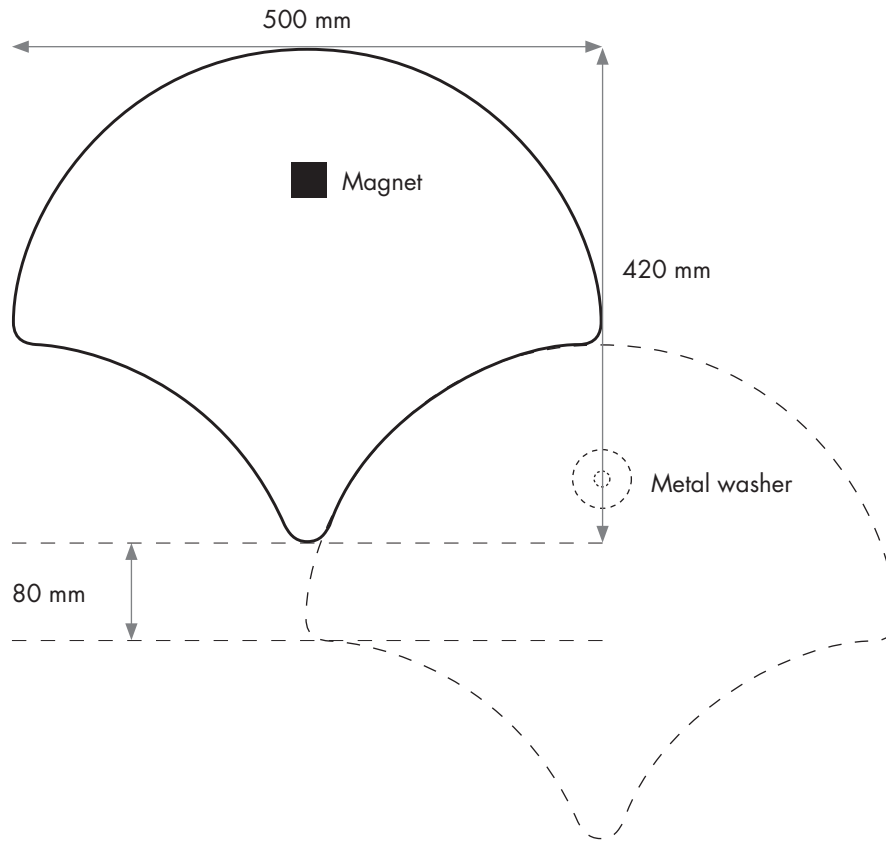

Ginkgo

Design: Stone Designs, 2014

Ginkgo is sound absorbing acoustic panels in polyester form felt that suppresses echo and noise level in the room. Ginkgo can as well be used as a wall decoration. It comes in five standard colours and the surface can be laminated in 30 additional colours.

Ginkgo is mounted on the wall with a magnetic fitting, so you can easily move around Ginkgo's when you feel like it, maybe to change a striped wall to variegated or from light to dark.

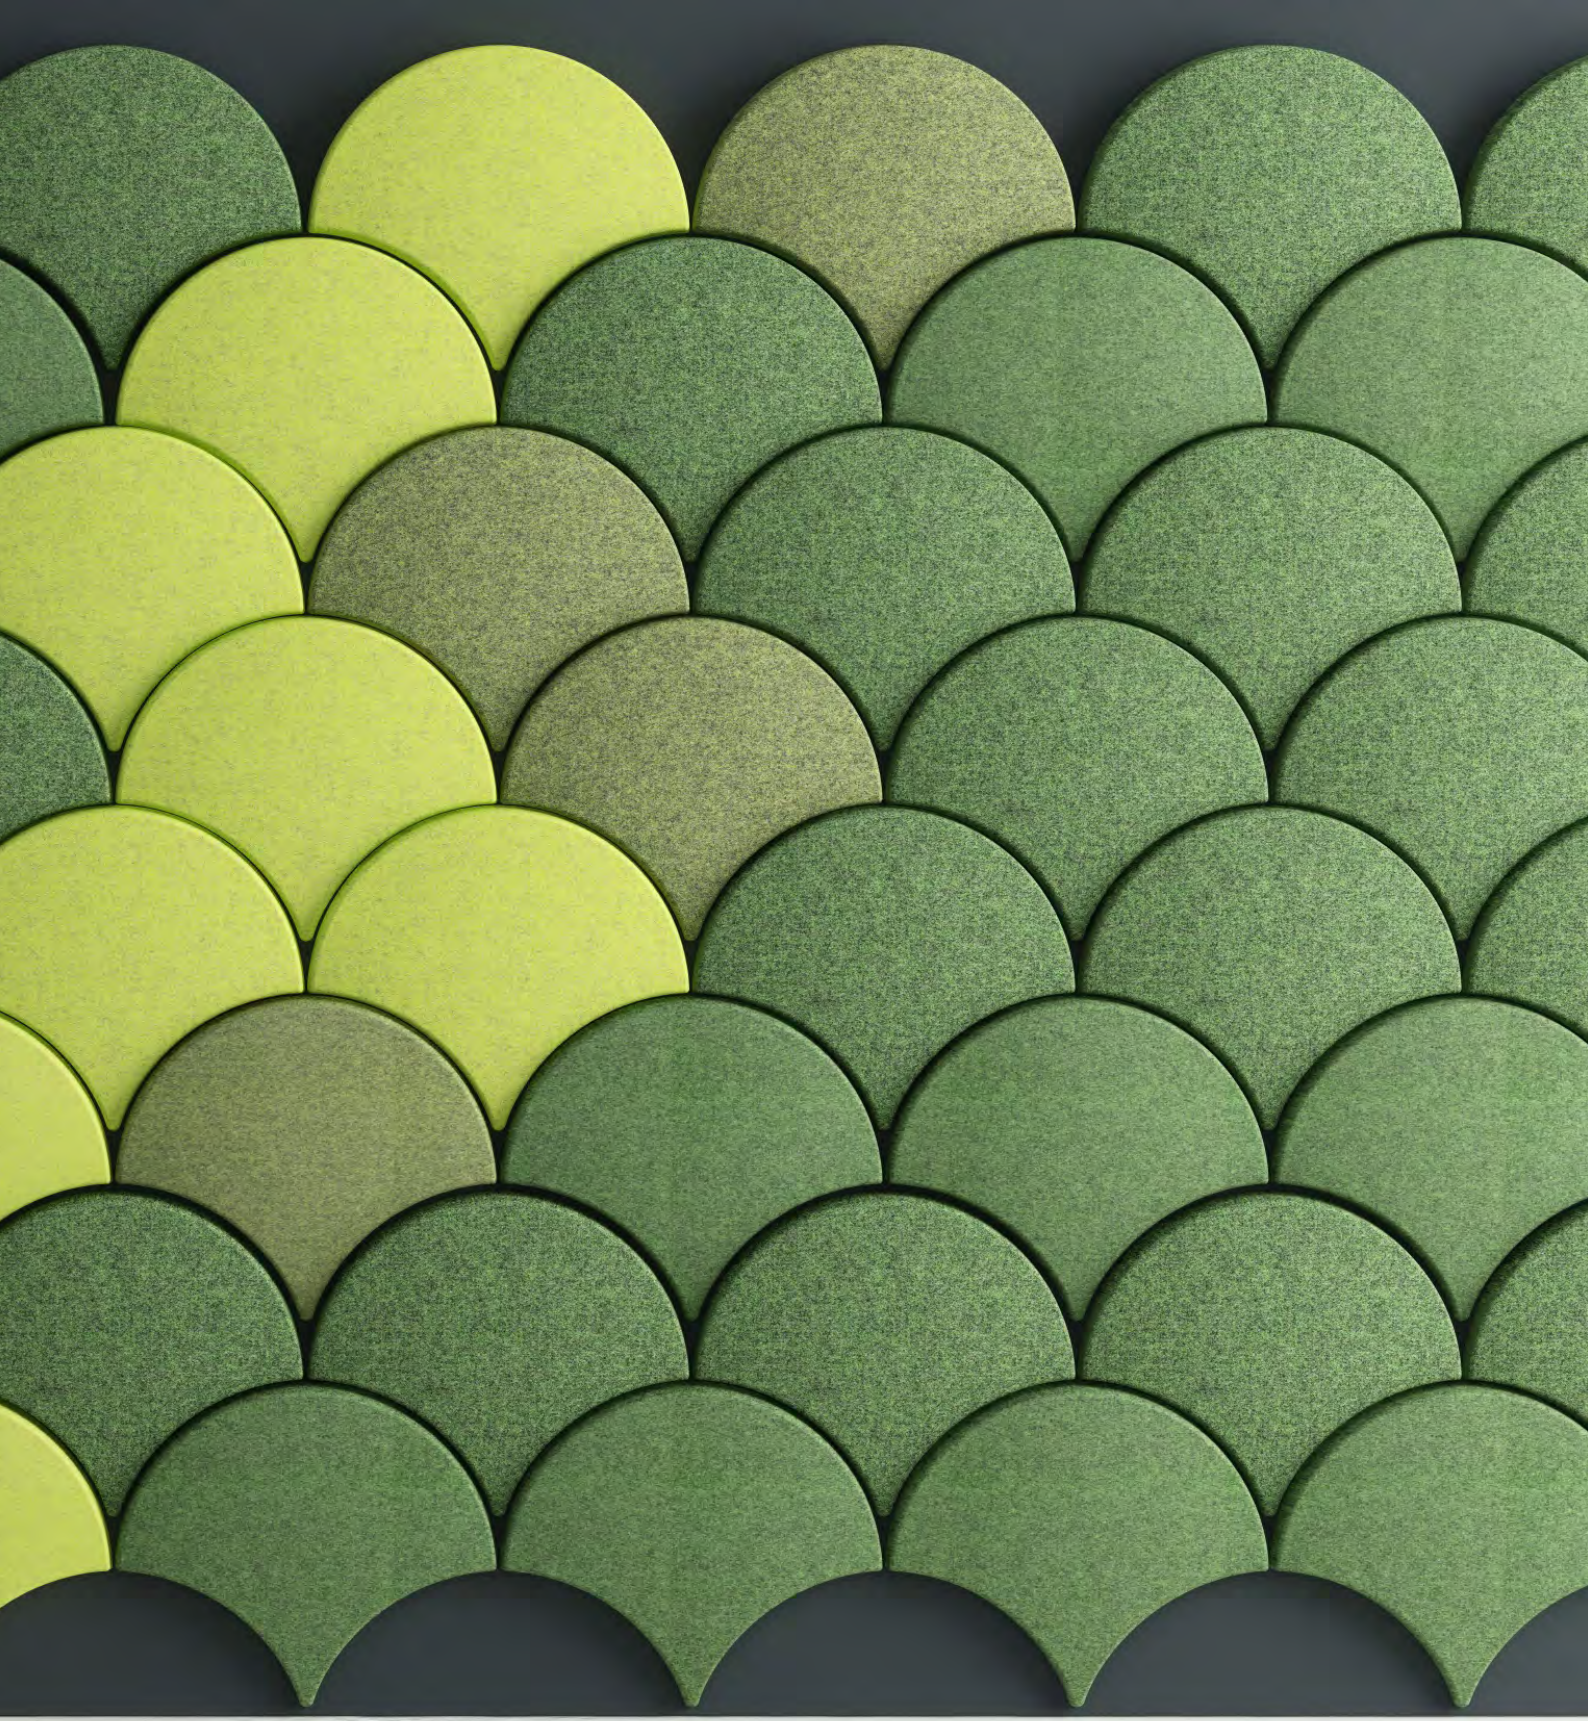

MEASUREMENTS

Overall height	420
Overall width	500
Overall depth	60
Weight (kg)	0,3

ABSORPTION MEASUREMENTS

The sound absorption for Ginkgo has been measured according to the reverberation room method (SS-EN ISO 354:2003) and evaluated according to SS-EN ISO 11654:1997. Absorption class = B.
