

# Oracle

Orlandini Design

true

**Oracle** is a tactile modular meeting solution for open-plan spaces. The ‘room within a room’ booth provides an informal semi-private comfortable meeting space for activity based workers. With its versatile configurations it can be used as a quiet harbor to get away from your desk, or as a meeting/collaboration space for 2-6 occupants.

The high back design creates the sense of a mini-environment acting as a divider from the outside world, we have also added a porthole vision feature that enables you to discreetly see if the booth/pod is occupied.

Also included within the range are a number of work surfaces/desk tops (along with provision for power) that can be substituted for sofa elements to provide hot desking or touchdown spaces for transient workers.

Oracle è una soluzione modulare per spazi aperti. La soluzione “sala all’interno di una stanza” garantisce uno spazio per incontri informali semi-privati o un luogo confortevole per lo smart working. Con le sue configurazioni versatili può essere infatti utilizzato come un porto tranquillo per allontanarsi dalla scrivania o come spazio di incontro/lavoro per 2-6 persone.

Il design con schienale alto conferisce la sensazione di un mini-ambiente che funge da divisorio dal mondo esterno, con cui interagire discretamente attraverso la finestra posta sullo schienale.

La gamma è completata da una serie di piani scrivania completi di predisposizione per il cablaggio.
