Timber

Technical information

Care and Maintenance

For general care and maintenance, simply wipe away most spills or marks with a damp microfibre cloth with warm, mild soapy water.

DO NOT use any of the following on your timber surface:

Commercial Cleaning Products, Abrasive Cleaners, Scouring Pads or Abrasive Papers, Acids and Alkalis, Solvents, Thinners, Turpentine (Turps), Ammonia, Bleach, Acetone, Easy-Off BAM!, M.E.K. or any other cleaning agents containing organic solvents or the above mentioned products.

Colour Palette

P4 reserves the right to alter its current colour palette at any time and without notice. If you prefer a different colour, shade or finish, please discuss with us. If it is suitable for the product and/or application we will be happy to offer it.

Finishes

P4 has selected to use a 30% Gloss Level as standard for all top coats. We use Australian made Mirotone products for sealer, stain and top coat. This may change at any time and without notice. If a specific gloss level is required for your project please advise P4 at time of requesting quotation as it may incur additional charges.

Product Availability

All finishes in this Colour Chart are available at no additional cost on most locally assembled and/or manufactured P4 timber products. Please refer www.p4.design to confirm if your chosen product is available in these finishes. Some finishes, including those marked as Premium, may incur additional charges.
