

Conic Collection

Table

Conic is a highly versatile table programme made up of central bases in plywood and tabletops in different formats and finishes. Its elegant conical shape presents a subtle geometric transition that transforms from a circle to a square, giving each base height its own unique shape. Conic bases work both individually and in multiple configurations to create high-capacity bars and tables.

Conic Collection

Collection Models

Connectivity Conic

The Conic collection offers the possibility to incorporate connectivity in both the table top and the column. Different installation options:

Connectivity in the column
only compatible with 634-O-01
accessory

1. The cable enters through the base of the column.
2. The cable runs up the inside of the column to the connection element.

Central connectivity
compatible with all accessories

1. The cable enters through the base of the column.
2. The cable runs up the inside of the column to the connection element.

Two connectivity points
compatible with all accessories with
the exception of the retractable ones

1. The cable enters through the base of the column.
2. The cable runs up the inside of the column until element A and is connected with element B via an aluminium profile installed under the table top.

Central connectivity between two
columns
compatible with 634-F-01 and with
634-B-01

1. The cable enters through the base of the column.
2. The cable runs up the inside of the column until the central connection element via an aluminium profile installed under the table top.
