imagine the possibilities

FREEDOM TO MOVE

ANIMATE from OE is a complete electrical system that uses click & connect modules & patented battery technology to provide complete freedom from fixed wall sockets & trailing power cables.

Inspired by the need to power our devices anywhere, in every possible space, ANIMATE provides a truly agile & dynamic working environment - with the additional safety of DC power.

FREE YOUR FURNITURE

Set furniture free with the easy integration of our patented QIKPAC battery, or click into the QIKPAC CARRY system for on-the-go charging. With the addition of our high power USB module, TUF HP, with 60W USB-C charging you'll never need to carry a bulky laptop charger again.

THE CHOICE IS YOURS

ANIMATE has been intuitively designed to integrate with the full range of OE desktop power units - allowing you to create entire DC power systems, built to run on stored energy and providing limitless possibilities in agile working environments.

Speak to us about a tailor-made solution, or dream up your own from our vast selection of QIKFIT modules & more.

QIKPAC: the enabler

POWERING THE FUTURE

OE's QIKPAC battery is the center of all things ANIMATE. Utilising premium lithium-ion cells, a single QIKPAC provides 240Wh - enough to power an individual all day, or a small team for a few hours.

Multiple QIKPACs can be connected in series to suit any size team or capacity requirement. Create a chain of DC power that can be incorporated into almost any scenario to enable entire mobile power delivery systems. Together with a host of accessories and a vast offering of OE power units, the possibilities are endless.

ENABLING A NEW ERA

QIKPAC heralds in a new era of power provision within office and educational environments. With this newfound freedom, the workspace or venue becomes a flexible, easily configurable scene, perfect for our new agile ways of working.

DID YOU KNOW?
QIKPAC has been programmed to charge only between the ideal range of 10%-90%, to increase it's lifespan.

learn more >>>

need more power add more QIKPAC

ADAPTABLE & SCALABLE

QIKPAC is scalable, equally capable of powering a single user independently or an entire workspace including desks and furniture. For more power and time between charges, just connect more QIKPAC. When designing your ANIMATE solution, the only questions you need to ask are:

WHO AM I POWERING AND FOR HOW LONG?

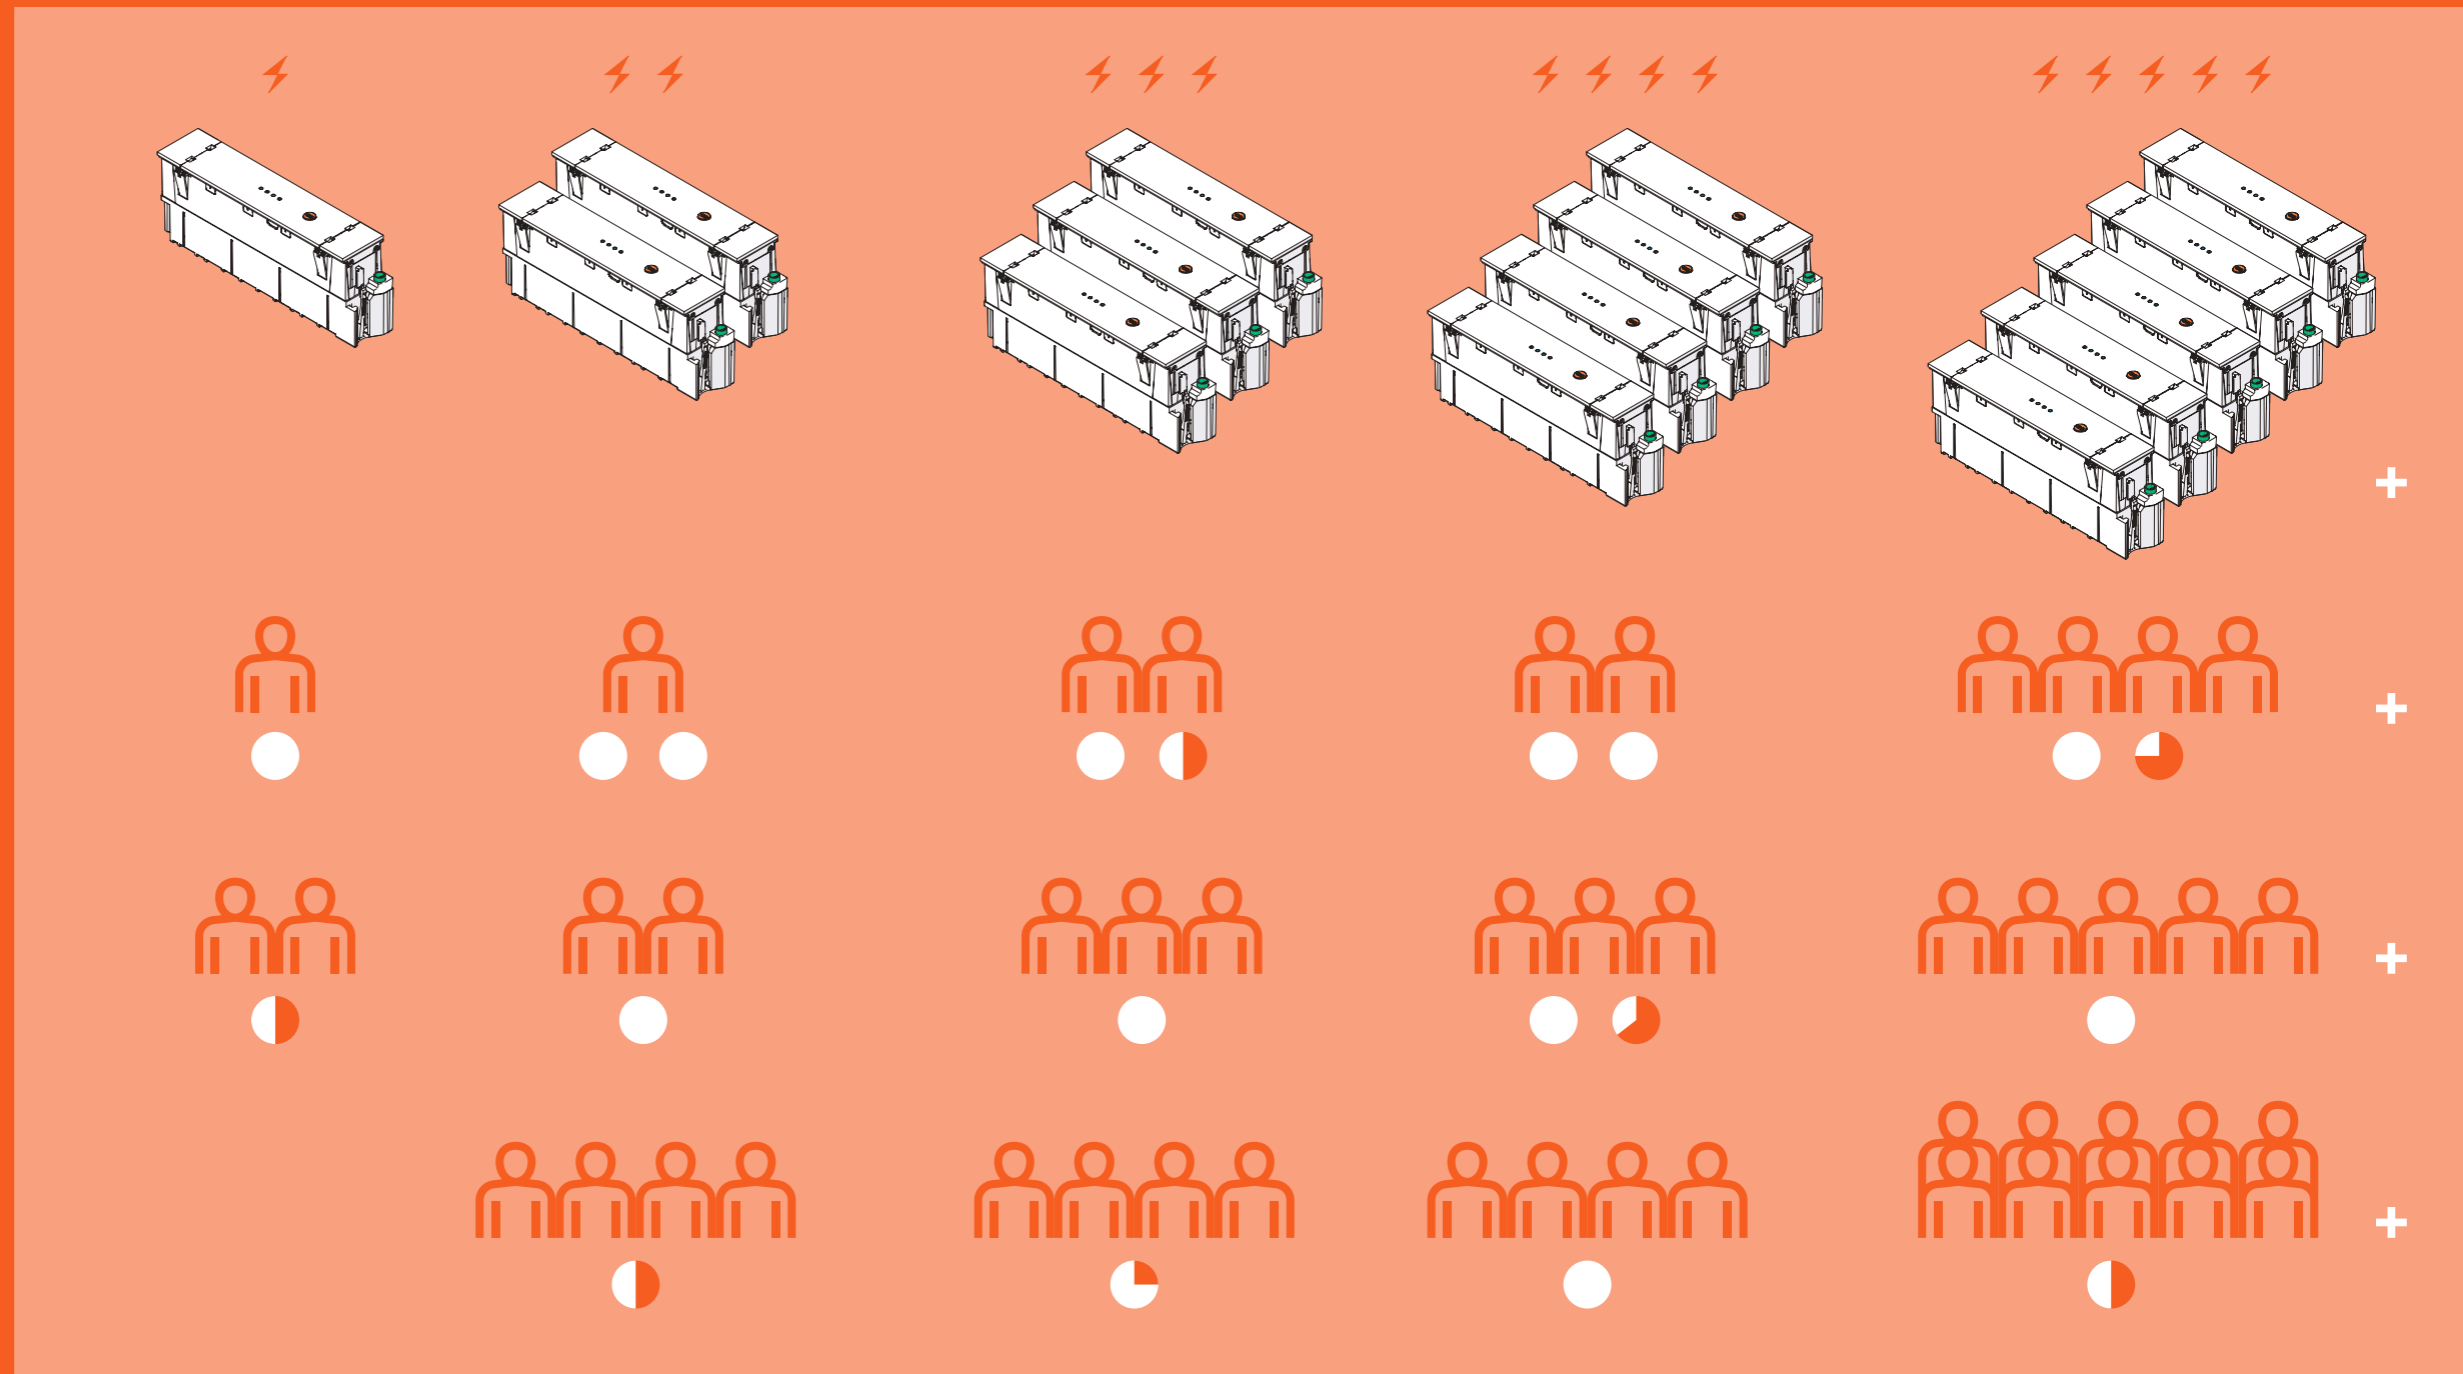

For example, a single QIKPAC Carry will power an average laptop for up to 28 hours. A single QIKPAC in QIKPAC Locate will power an average sit to stand workstation with laptop and monitor for an entire day - maybe even more! For more freedom between charging times, simply connect more QIKPAC.

 # of QIKPACs

 # of users

 # days between charges

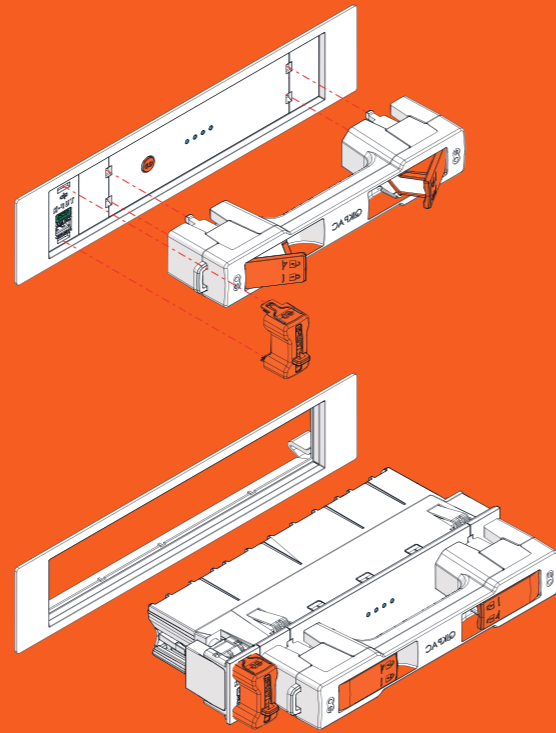

NOTE: this chart is to provide general guidance only. Charging requirements will vary, depending on level of usage and demand between users. Remember, this system is designed to be adaptable, meaning you can add & remove QIKPACs to meet your exact needs!

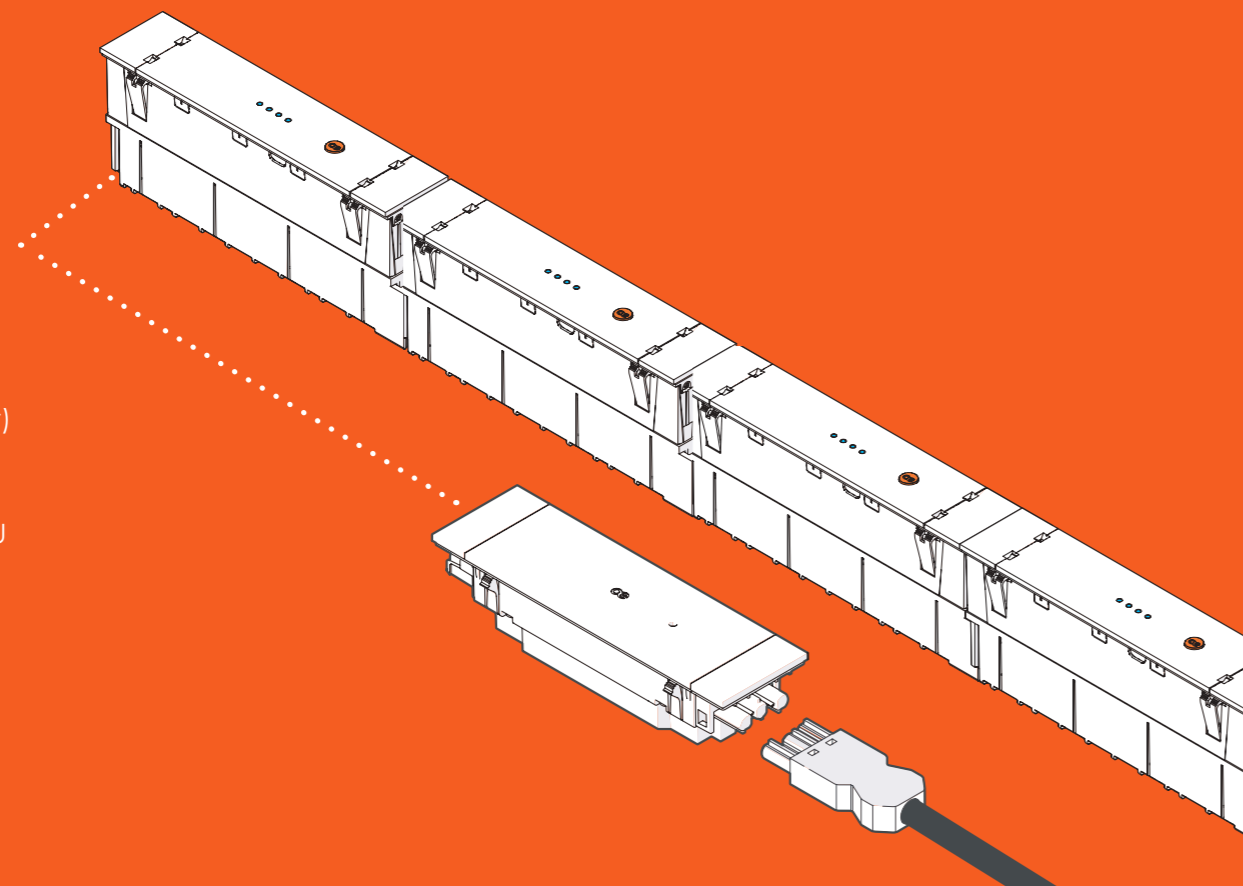

how to charge QIKPAC batteries

QIKPAC REMOVAL TOOL

QIKPAC batteries integrated into furniture can easily be removed using the handy QIKPAC REMOVAL TOOL. Once removed from the furniture, the QIKPAC battery can be charged on the QIKPAC CHARGER BASE.

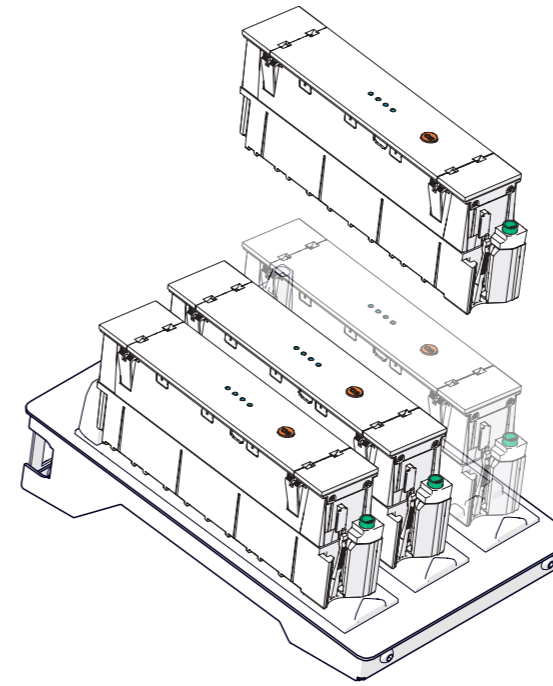

QIKPAC batteries can be charged in-situ within furniture using IEC or GST entry options built into the furniture. Connect with an IEC or GST cable (sold by OE) and plug directly into a power outlet to recharge.

QF30 PSU

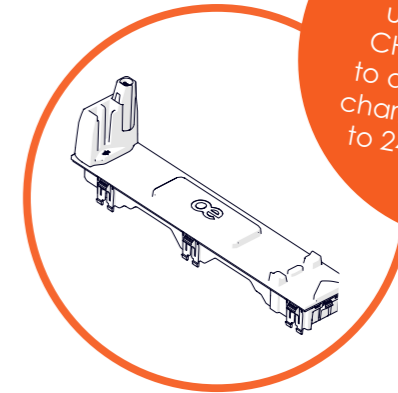

(Power Supply Unit)
Charge up to 4
QIKPAC batteries
from one QF30 PSU

QIKPAC CHARGER BASE

When QIKPAC batteries are low on power they can be recharged on the QIKPAC CHARGER BASE. This user-friendly charger base is designed to charge three QIKPAC batteries (or QIKPAC CARRY) units at one time. Multiple charger bases can be connected together and powered from a single plug.

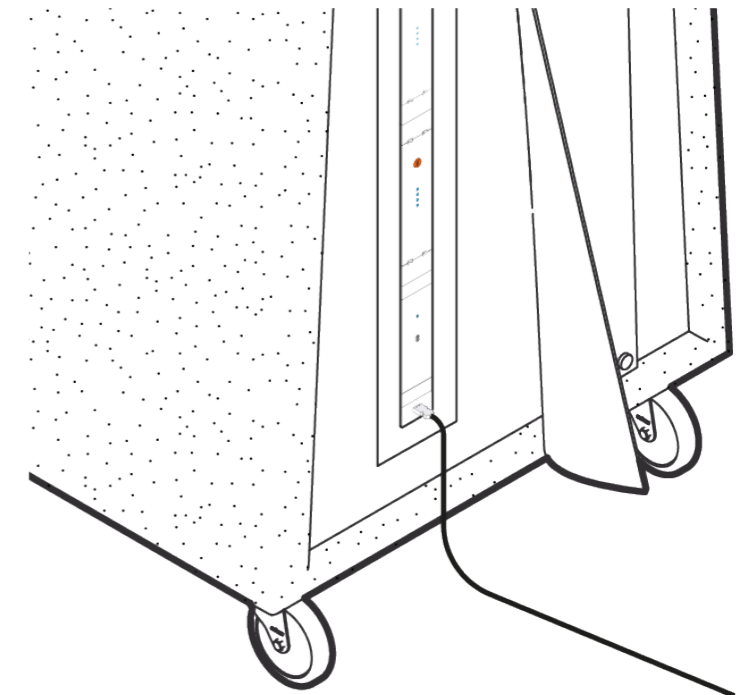

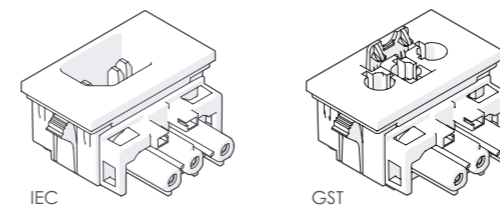

DID YOU KNOW?
Furniture OEMs can use the QIKPAC CHARGING SHOE to design their own charging carts of up to 24 battery units.

UNPLUG AND PLAY

Integrating an IEC or GST entry into your ANIMATE solution allows QIKPAC batteries to be charged while fitted into furniture.

Charge or run your OE ANIMATE install using an C13 IEC or GST 18i3 cable. Simply plug into a wall socket while charging and unplug to unlock freedom furniture.

part 1: mobility

bring your furniture to life

mobility

QIKPAC batteries can be fitted directly into steel, aluminium or plastic surfaces. With the simple addition of **QIKFRAME** or **QIKFRAME STEEL**, the **QIKPAC** can also be easily integrated into soft furnishings. Free your furniture from fixed power sockets and go cable free.

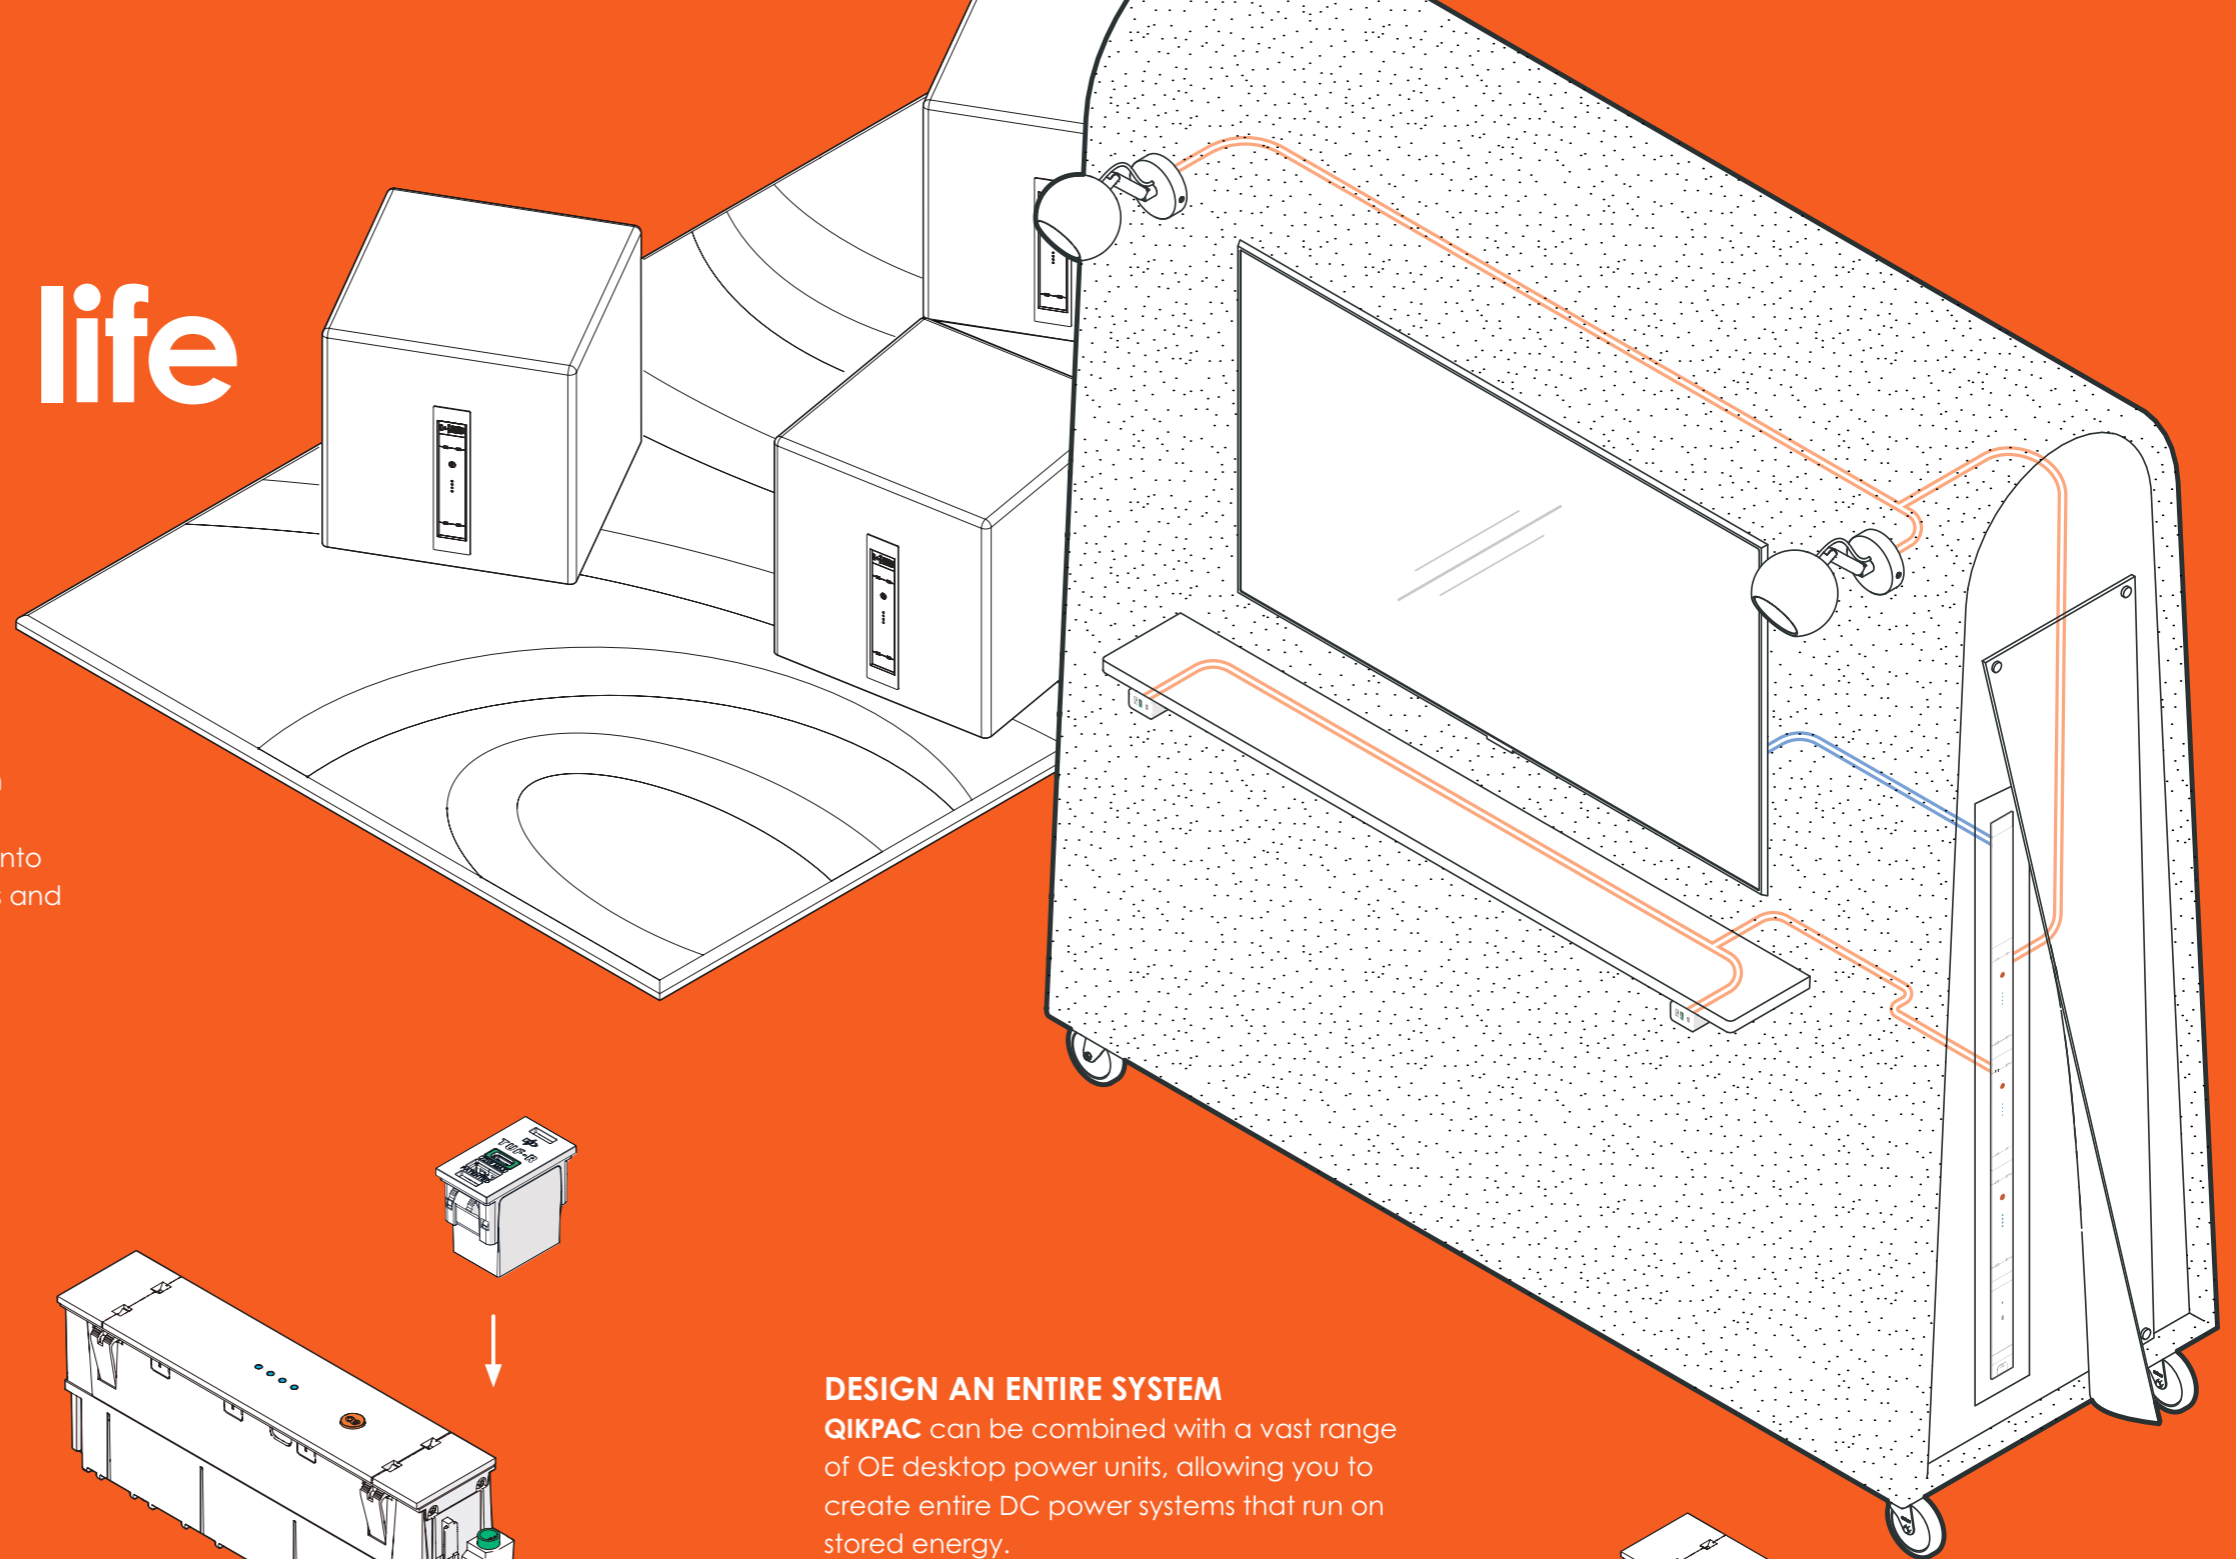

QF5 TUF-HP®

This high-power USB charging unit is an ideal addition to a small, single seat or ottoman. Providing useful high-power laptop charging in lounges & break-out areas.

QIKPAC BATTERY

QIKPAC can be installed as a single module as illustrated here, or can be installed in multiples for increased capacity. Customize the number of **QIKPAC** for flexibility in charging times and to meet the needs of the environment.

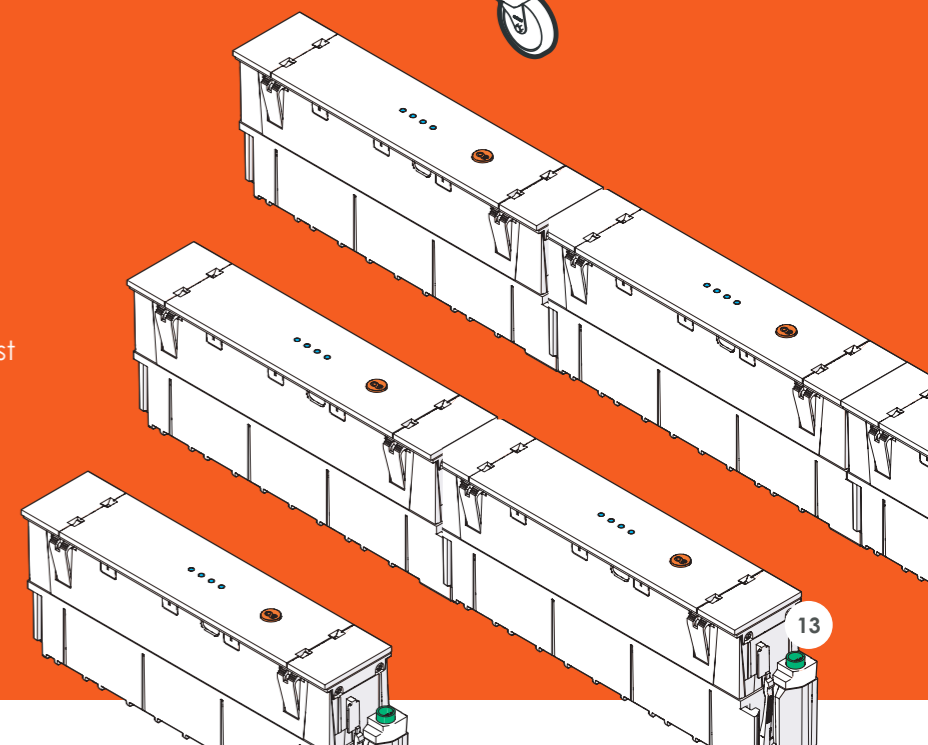

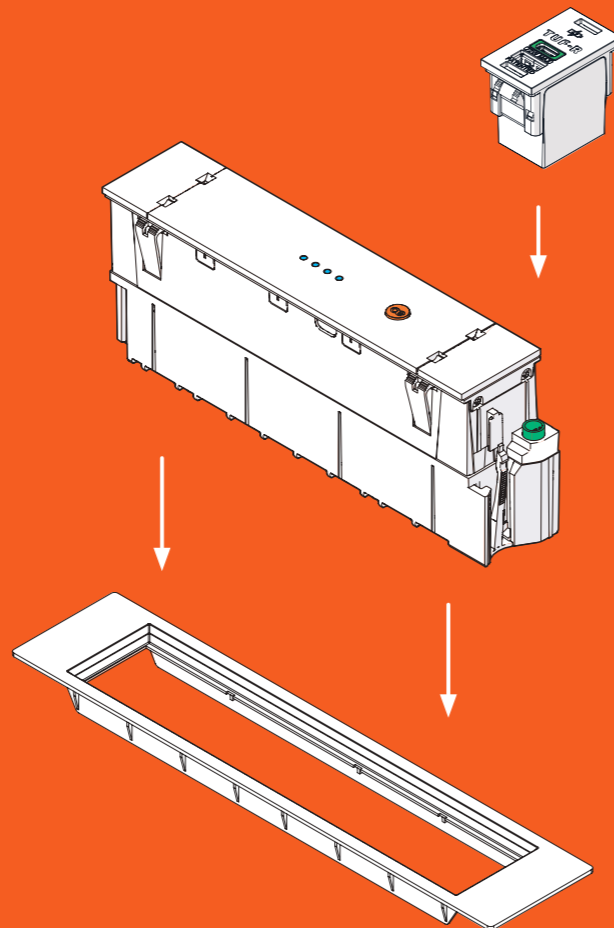

QIKPAC + QIKFRAME + TUF-HP® is a simple configuration - just one of hundreds of ways our patented technology can be seamlessly integrated into furniture.

DESIGN AN ENTIRE SYSTEM

QIKPAC can be combined with a vast range of OE desktop power units, allowing you to create entire DC power systems that run on stored energy.

Capacity can easily be increased by linking multiple **QIKPAC** batteries, allowing more time between charges for high current applications such as mobile media units and booths. **QIKPAC** and **ANIMATE** accessories are modular providing flexibility in customisation to meet the needs of almost any environment.

part 2: agility

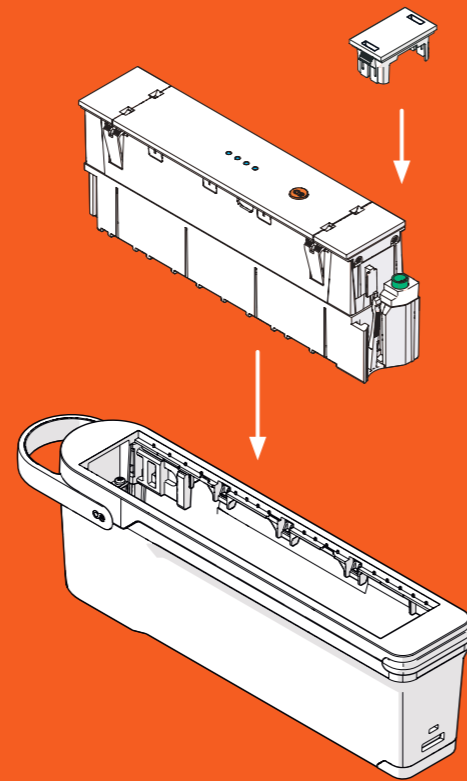

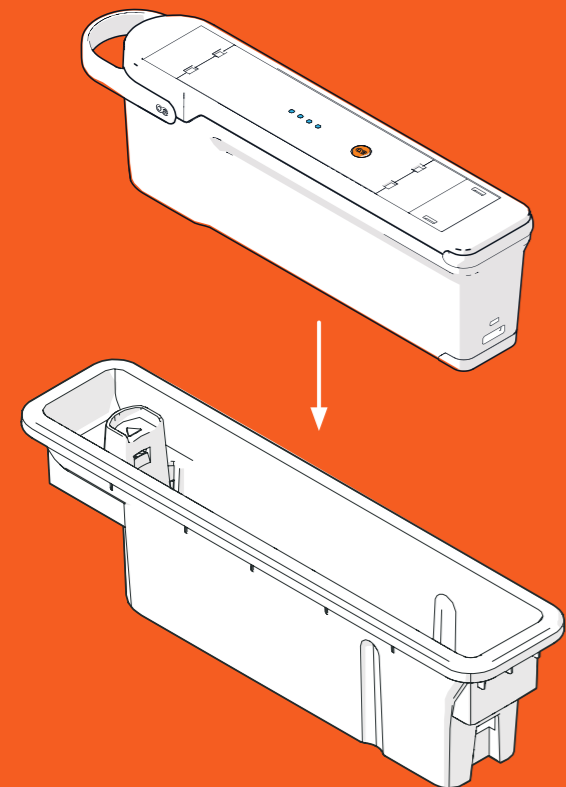

unlock an agile workplace

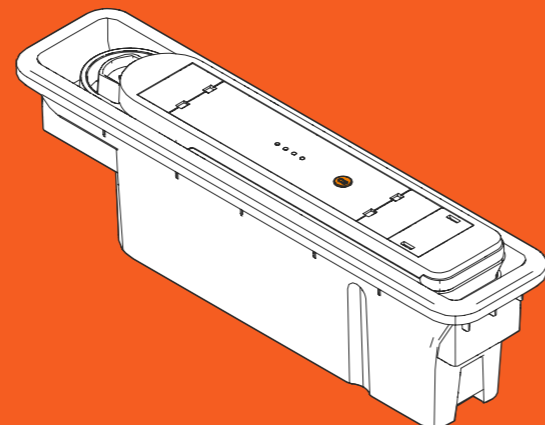

Imagine coming into the workplace every morning with the ability to not only choose your desk but to move it as well. OE's ANIMATE system does just that, by introducing **QIKDOC** to workstations & desks. Drop in **QIKPAC CARRY** for a fast & interchangeable battery powered station with no fixed location or arrangement.

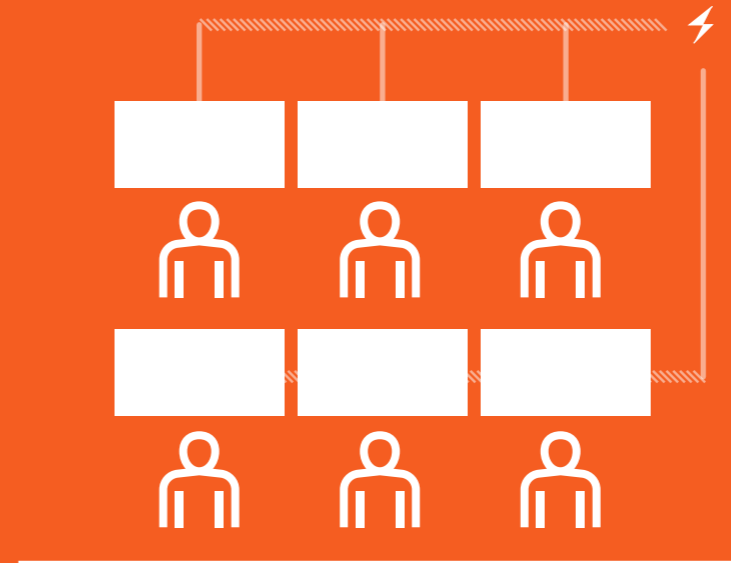

With 240Wh, our powerful **QIKPAC** battery has enough juice to power your workspace for an entire day.

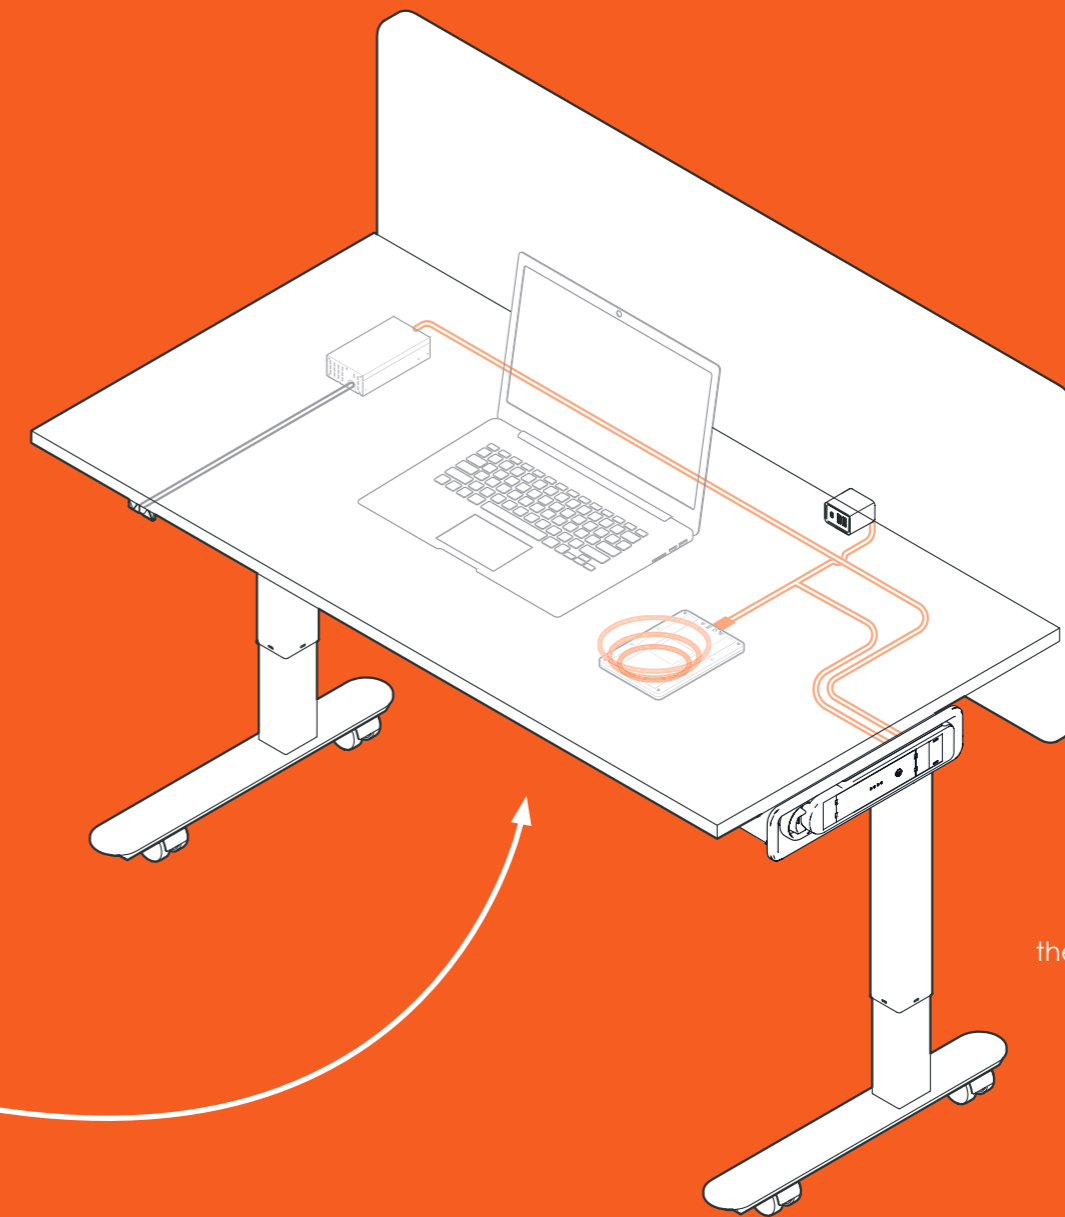

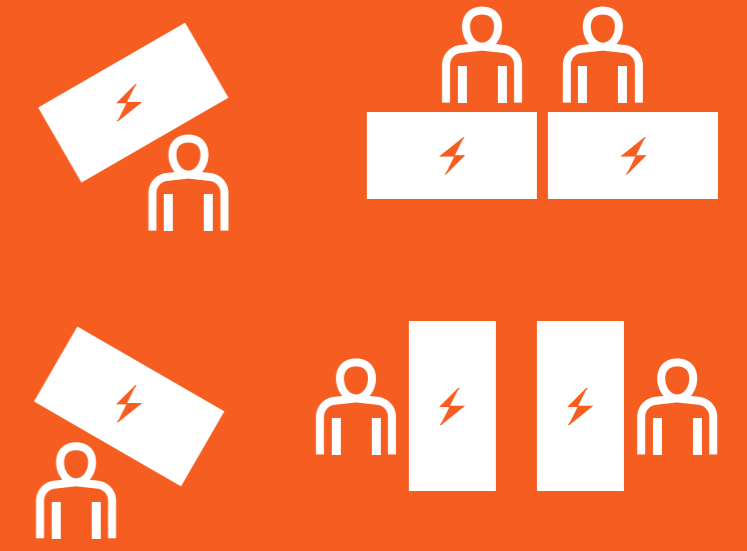

Mounting **QIKDOC** in or under a desk or workstation means that power can be added to the station, right when it is needed. For more flexibility & conservation of energy than ever before.

fixed vs.

free

Simply pick up a **QIKPAC CARRY** from the charging base & drop it straight into your chosen workstation via the **QIKDOC** holster for instant, on-demand power to your chosen set-up.

QIKPAC CARRY
Our signature battery in a handy mobile case.

QIKDOC
Locate and power desks or furniture from a designated place.

PICCOLO DC
High power USB charging.

ARC-H LD
Sub surface wireless charger.

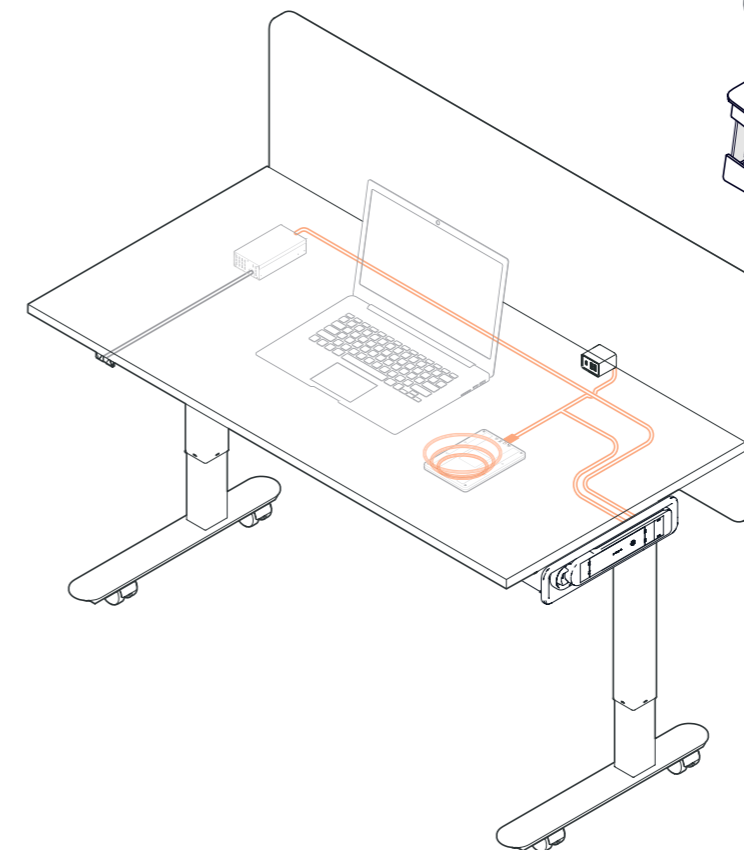

CHARGING BASE
Allows 3 QIKPAC or QIKPAC CARRY units to be charged with ease.

HOW DOES IT WORK?

INSTANT, LOCATABLE POWER

Grab your coffee & a QIKPAC CARRY & get set for a full day of flexible power. Each QIKPAC battery has enough juice to power your workstation for an entire day and can be easily swapped for a freshly charged QIKPAC battery when you need it.

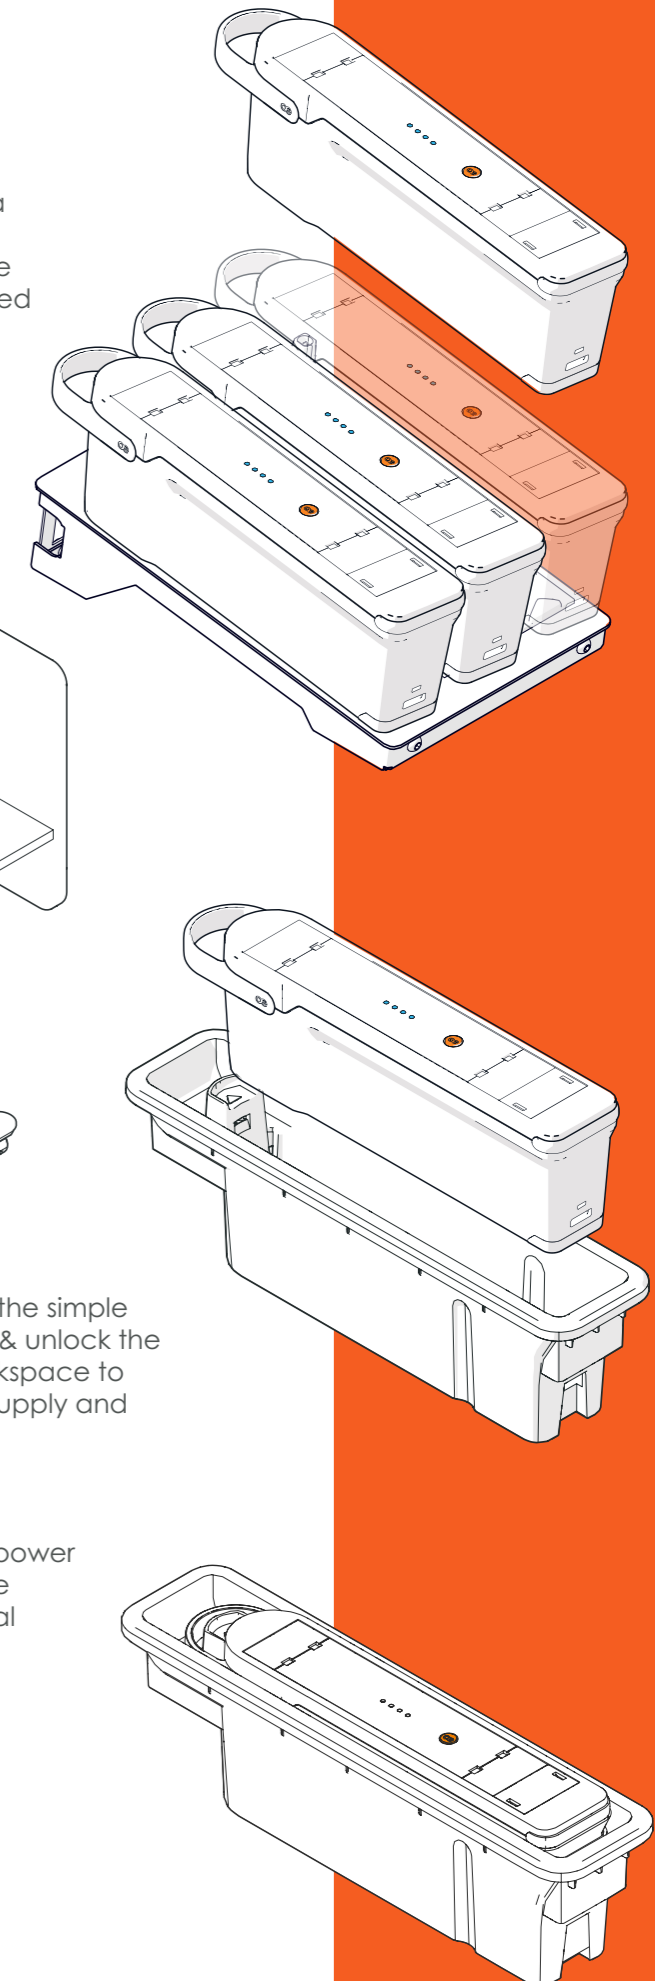

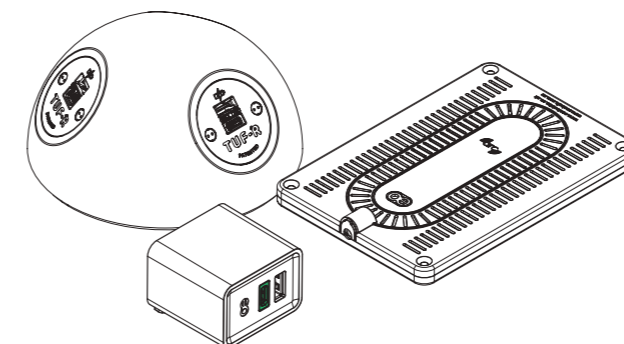

UNLOCK AGILE

Powering a workstation has never been easier with the simple addition of a QIKDOC. Enable "cable free" power & unlock the freedom to move workstations. Configure your workspace to suit the end user's needs, not the available power supply and say hello to an agile workspace!

DESIGN YOUR OWN WORKSTATION

QIKPAC has the ability to animate a sit-stand desk, power a monitor, laptop & charge mobile phones. Choose your preferred power modules and design your ideal workstation.

part 3: freedom

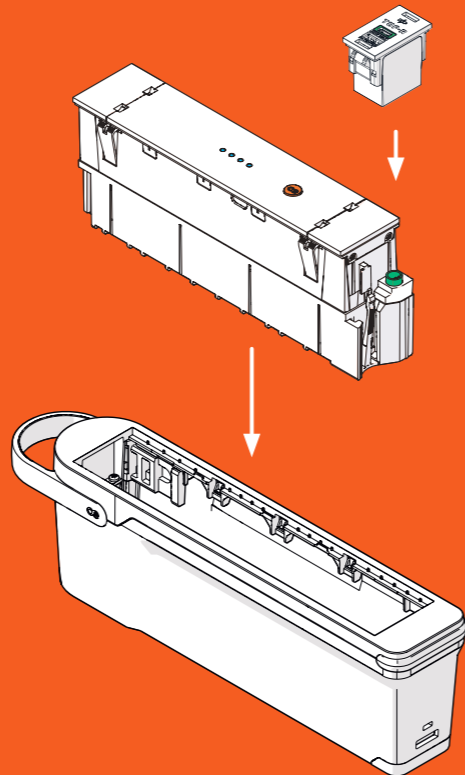

the ultimate power bank

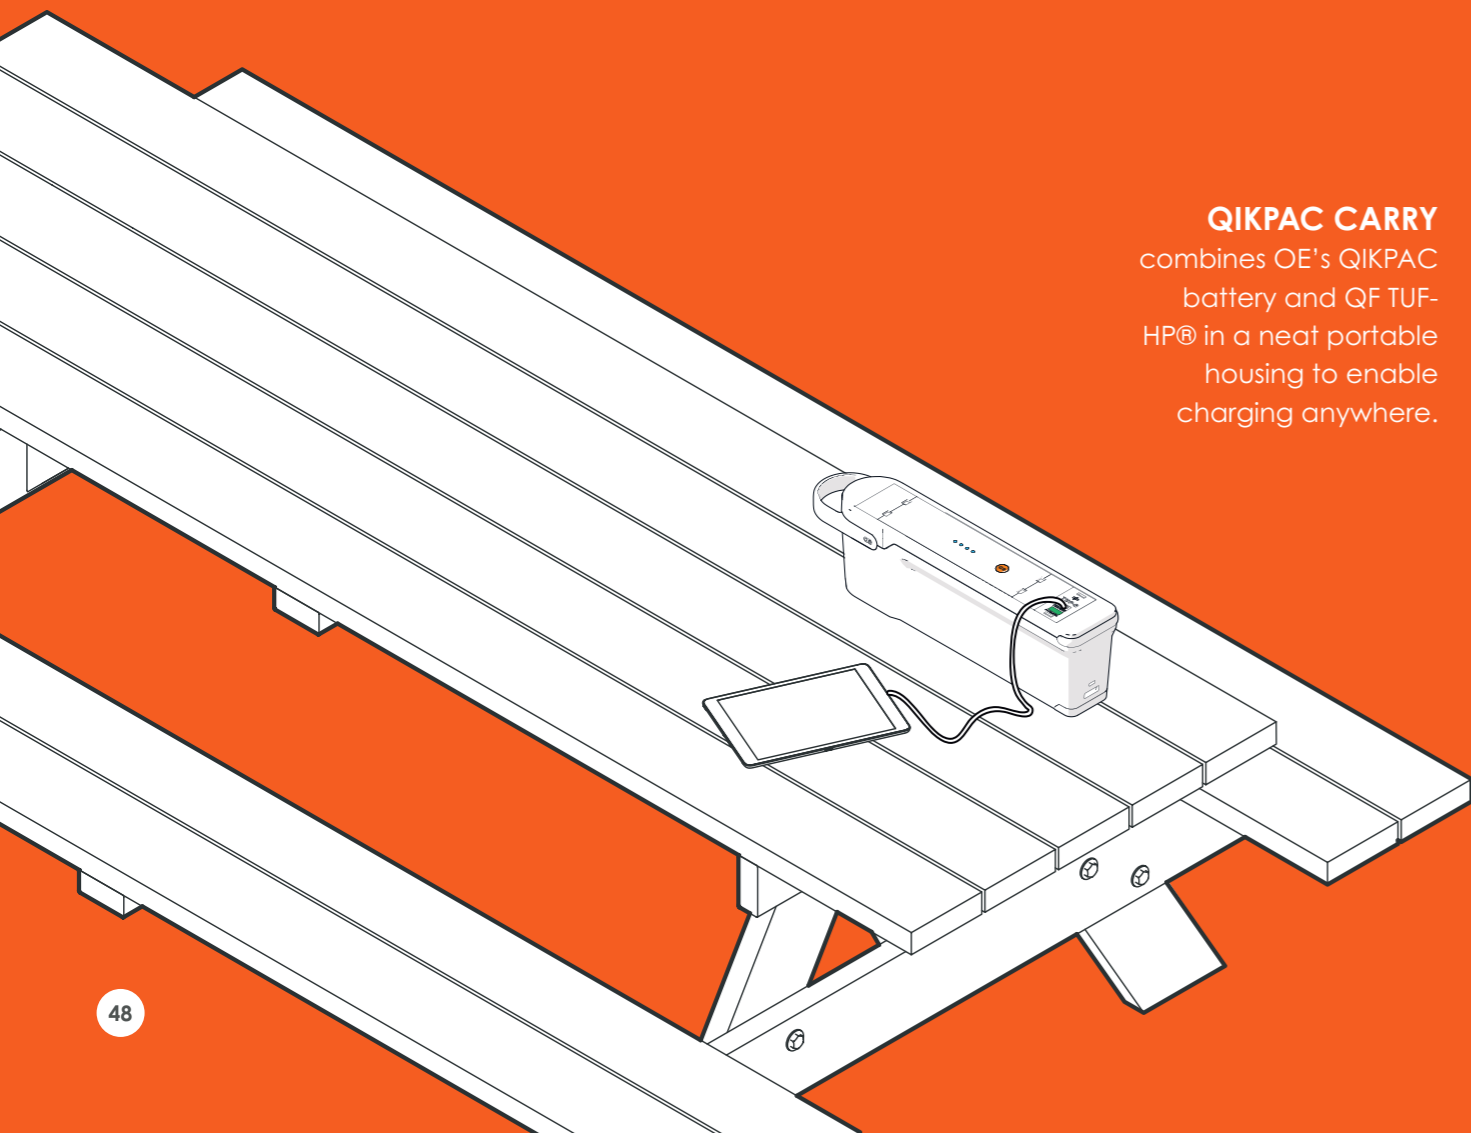

freedom

PERSONAL BATTERY BANK

QIKPAC CARRY provides up to 28 hours of laptop and mobile phone power from a single charge. QIKPAC CARRY is completely portable allowing you to work at the beach, park, cafe or anywhere you choose.

QIKPAC CARRY combines OE's QIKPAC battery and QF TUF-HP® in a neat portable housing to enable charging anywhere.

HOW DOES IT WORK?

GRAB & GO!

QIKPAC CARRY combines our QIKPAC battery & high power TUF-HP® USB module for "work anywhere" laptop and mobile phone charging!

QIKPAC CARRY is a portable power solution that allows you to be completely mobile - pick up and move to a new location at your convenience.

POWER ANYWHERE

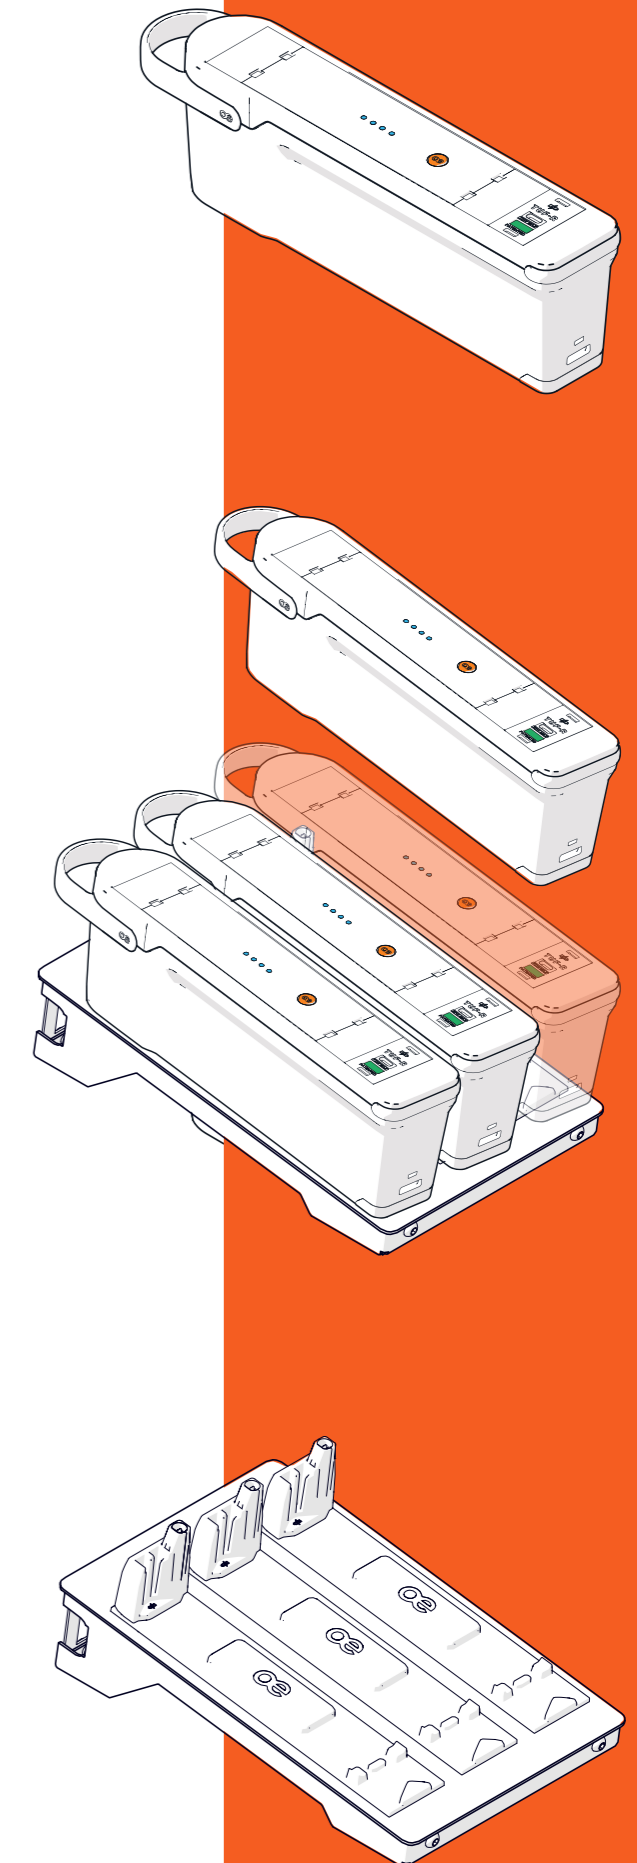

Why not meet your client at the park today? Or better yet, the pub! With the QIKPAC CARRY you'll never need to search for sockets again.

With this newfound freedom, the workspace becomes anywhere you want it to be.

NON-STOP POWER

After a long day or two out with your QIKPAC CARRY, simply drop your pack onto our QIKPAC CHARGING STATION.

There's enough space for 3 packs, so you can grab a fresh one while you're there!

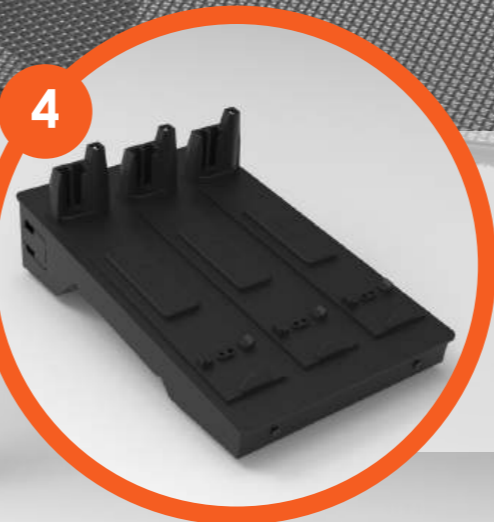

QIKPAC BATTERY

QF5 TUF-HP
Innovative power module with high power USB charging!

QIKPAC CARRY
Charge anytime, anywhere.

CHARGING BASE
Enable QIKPAC and QIKPAC CARRY to be charged at ease.

a bit about us

BRAND PROMISE

In design, service, quality & safety; at OE we go above & beyond to provide the highest level of service for our clients.

Driven by challenge & inspired by the need for versatility & efficiency across every possible platform; solution through innovation is our passion & is at the heart of everything we do.

// SERVICE

Above all else, our customers come first, & that's why they love working with us.

From first contact right through to delivery, we are committed to elevating customer experience beyond all expectation.

// QUALITY

Compromise on quality? Never. Our design team are experts in their field & masters of minimising cost - but never at the expense of quality.

Our customers are presented the very best solutions & at the right price, always.

// DESIGN

Since inception & throughout humble beginnings, the OE motto has been honoured in both philosophy & practice.

Measured by the successes of our unparalleled passion in product design, we are always innovating.

// SAFETY

Safety is vital. That's why if a unit is made by us, then it's tested by us.

Under OE's 100% testing policy, we ensure all products are up to the electrical safety standards our customers know & expect from us.

Inspire. Create. Deliver.
