VILLHEM

VILLHEM

A contemporary classic with its sights set on the future

We are a design company that manufactures high-quality furniture. We have primarily focused on public and commercial environments, but today, as the boundaries between spaces continue to blur, our furniture fits just as naturally in the office as it does in the home. Villhem is an experiment between minimum and maximum - and everything in between. Where is maximum comfort needed, and where is a personal space for a moment of waiting enough?

Villhem is a play with words. Vill hem! Meaning; I want to go home! For us, design is development, the development of tomorrow's sustainable products. Core values that make sustainability real: function, quality, and all the way to simple separability.

A clear yet timeless expression

Villhem has no hidden construction; instead, it reveals its structural frame and exposed joints. Clean, distinct lines create a clear yet timeless expression.

Villhem features a compression-moulded wooden seat shell with wooden armrests. It can be upgraded with padded armrests, an upholstered seat, backrest, and neck cushion. Perhaps you only want to add a cushion, or choose everything, or nothing at all.

Villhem Supersoft has an internal steel frame with nozag springs, and a padded, leather-upholstered 'down jacket' that offers soft, comfortable cushioning. The steel construction and zinc-cast joints ensure that every armchair can be upgraded, renewed, and easily separated.

VILLHEM

We are now taking Villhem further into the future by adding a low-back armchair and an footstool. Or rather: two armchairs and two footstools, as they follow the existing alphabet.

One version in compression-moulded, layer-glued wood, and one Supersoft version with a steel inner frame, nozag springs, and leather upholstery.

Villhem Table features a simple, precise frame that can be chromed or powder-coated in colour, paired with square, rectangular, or round tabletops. It integrates effortlessly into any environment, from contract interiors to private homes.
