Know-how

A long-standing industrial expertise and, always, a touch ☀ of Italian sunshine within. We manufacture in-house in Italy. ^{IT} This translates into controlled quality, reliability, flexibility, attention to detail, and a sense of responsibility 🌱 toward what we bring into shared spaces. Ours is an industrial approach, but with a design-driven and ✈ contemporary vision.

Commitment

Quality is a responsibility. Urbantime is Diemmebi's outdoor brand, backed by 40 years of manufacturing heritage. Driven by commitment, vision, and impact assessment, and mindful of environmental and socio-cultural shifts, the company has undergone a natural evolution into a ♥ **Benefit Corporation.**

Know-how

Our approach is guided by a design-driven vision that always puts people first. Technical expertise, design culture, and a **deep knowledge of metalworking** are at the core of every collection we develop.

Durability

Each collection is designed to withstand time, everyday use, and outdoor exposure with reliability ☀️ and minimal maintenance. Materials, treatments, and finishes are carefully selected to guarantee resistance, durability, and long-term aesthetic stability. ⌚

Durability Process

	Production and Materials	The use of advanced materials, combined with our numerous in-house processes, enables us to ensure prompt and effective quality control throughout the entire production chain.
	Quality and Certifications	The products are tested for durability and corrosion resistance in accordance with EN12727, EN9227 and PTP45 standards, ensuring reliability in all weather conditions.
	Outdoor protection	To maximise outdoor durability, we apply hot-dip galvanising, cold galvanising or Sendzimir galvanising treatments, depending on requirements, to ensure full protection of the steel.
	Sustainability and Finishes	Aluminium slats with a wood effect finish combine aesthetics and sustainability: they reduce maintenance and environmental impact without compromising visual and tactile appeal.
	Final coating	The polyester powder coating applied at the end of the cycle ensures protection against chemicals, weathering and UV rays, with no flaking.

Liberty.080 the new modular outdoor collection

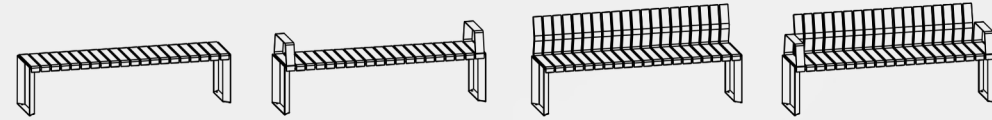

Functions

Leave room for imagination and ✨
create endless compositions.
Thanks to the verticality of its
aluminum slats, Liberty.080 breaks
free from
all constraints, transforming urban
furniture into a unique, tailored
experience where minimalist design
shapes public space with absolute
freedom.

Compositions

The collection breathes and evolves in symbiosis with its environment. Starting from linear or curved frames, the possibilities expand with backrest or backless slats and freely positionable armrests, creating configurations that are always unique.

trapezium leg

The leg designed for standalone seating. Dynamic and striking, it follows the same angle as the backrest, creating an iconic silhouette.

square leg

A compact and essential leg, embodying a solid and balanced aesthetic. It is the ideal component for modular compositions, seamlessly linked by the infinity leg.

infinity leg

The core connecting element of the system: it allows for an infinite number of linear or curved modules to be joined, creating seamless, continuous compositions.

Legs

The three **leg types** interpret different formal and functional approaches, once again expanding the design freedom of the Liberty.080 system.

Liberty.080 combines social responsibility and environmental sustainability. Made in Italy with 100% recyclable aluminum and galvanized iron, it promotes a **circular economy** through durable, easily replaceable components. Its modular design optimizes materials, while compact packaging and quick assembly reduce emissions, ensuring minimal impact on public spaces.

Liberty.080 Linear

An essential and timeless archetype: the linear module is the foundation for defining space with rigour and precision.

Liberty.080 Linear

Designed to sit. Made to stay.

The Liberty.080 linear module is available in two standard lengths: 120 cm (2-seater) and 190 cm (3-seater).

Thanks to its independent vertical aluminum slats, each available slot is fully customizable with:

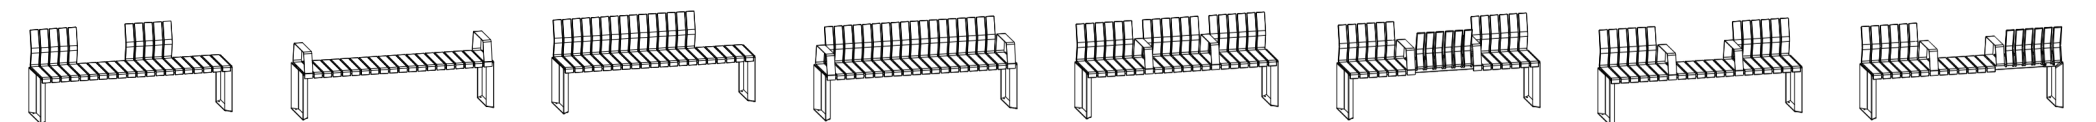

♦ **Backless slats** which can also serve as side tables or support surfaces.

♦ **Backrest slats** positionable in opposing directions to create vis-à-vis configurations.

♦ **Armrests terminal** intermediate, or freely positionable.

More than just an outdoor seating system, Liberty.080 is a modular platform designed to interpret the evolving needs of collective spaces.

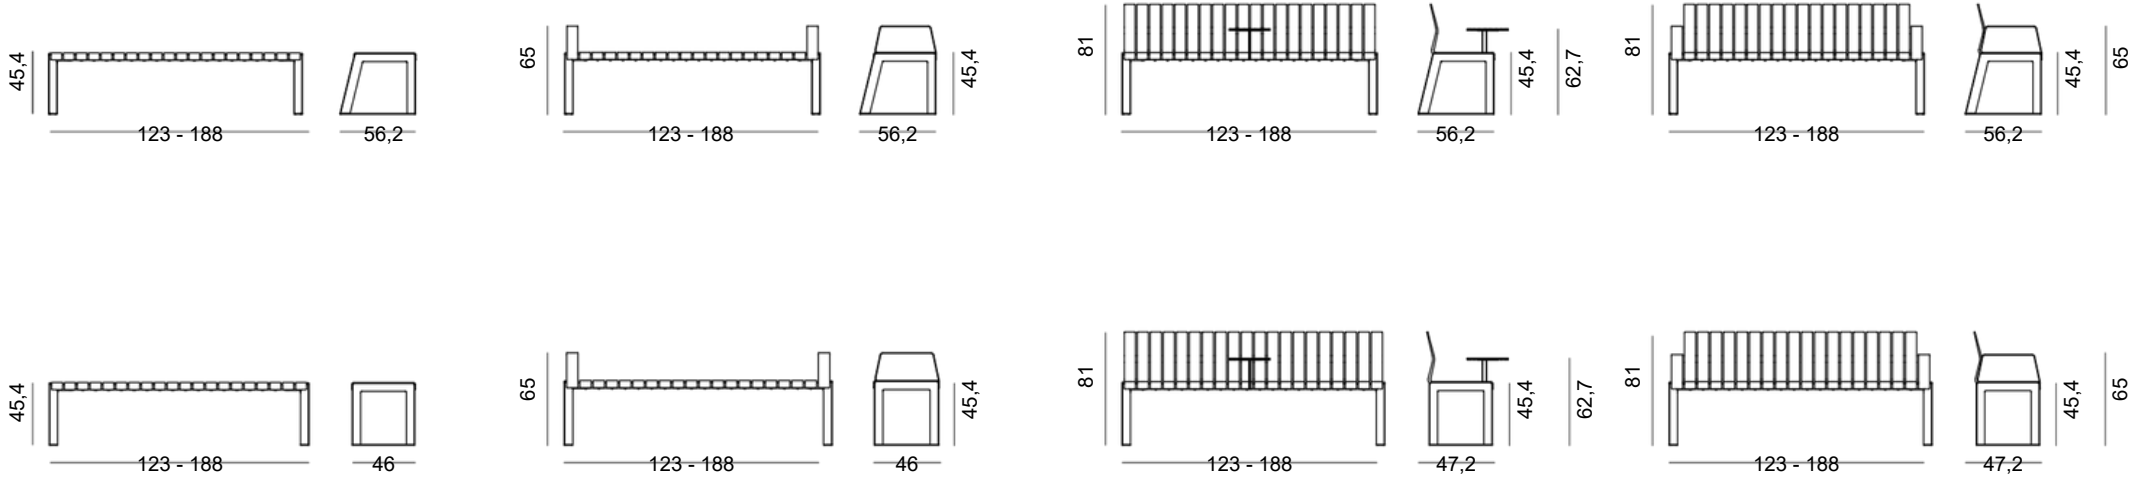

♦ **Ø30 table**, available as an accessory. It can be positioned at any available point along the linear seats.

Liberty.080 Linear

The seating module is crafted with interchangeable die-cast aluminum slats and Sendzimir galvanized steel sub-seat supports, with side legs and armrests in galvanized sheet metal. The entire structure is finished with polyester powder coating. Designed for rapid assembly in just three steps, the bench is ready for ground anchoring and shipped flat- packed in compact packaging: a solution that optimizes logistics and installation while reducing emissions.

Liberty.080 Curve

With its concave and convex forms, the curved frame breaks the rigidity of space to embrace the fluidity of urban life.

Liberty.080 Curve

Curve the space, multiply the possibilities.

Liberty.080 evolves into the curved module, defining 90° angles with absolute geometric precision.

Thanks to its independent vertical aluminum slats, here too each available slot is fully customizable with:

♦ **Backless slats** which can also serve as side tables or support surfaces.

♦ **Backrest slats.**

♦ **Armrests terminal**, intermediate, or freely positionable.

More than just an outdoor seating system, Liberty.080 is a modular platform designed to interpret the evolving needs of collective spaces.

Liberty.080 Table

The Liberty.080 table integrates the collection with aesthetic rigor and versatility, allowing every centimeter of length and depth to be adapted to the specific needs of the project.

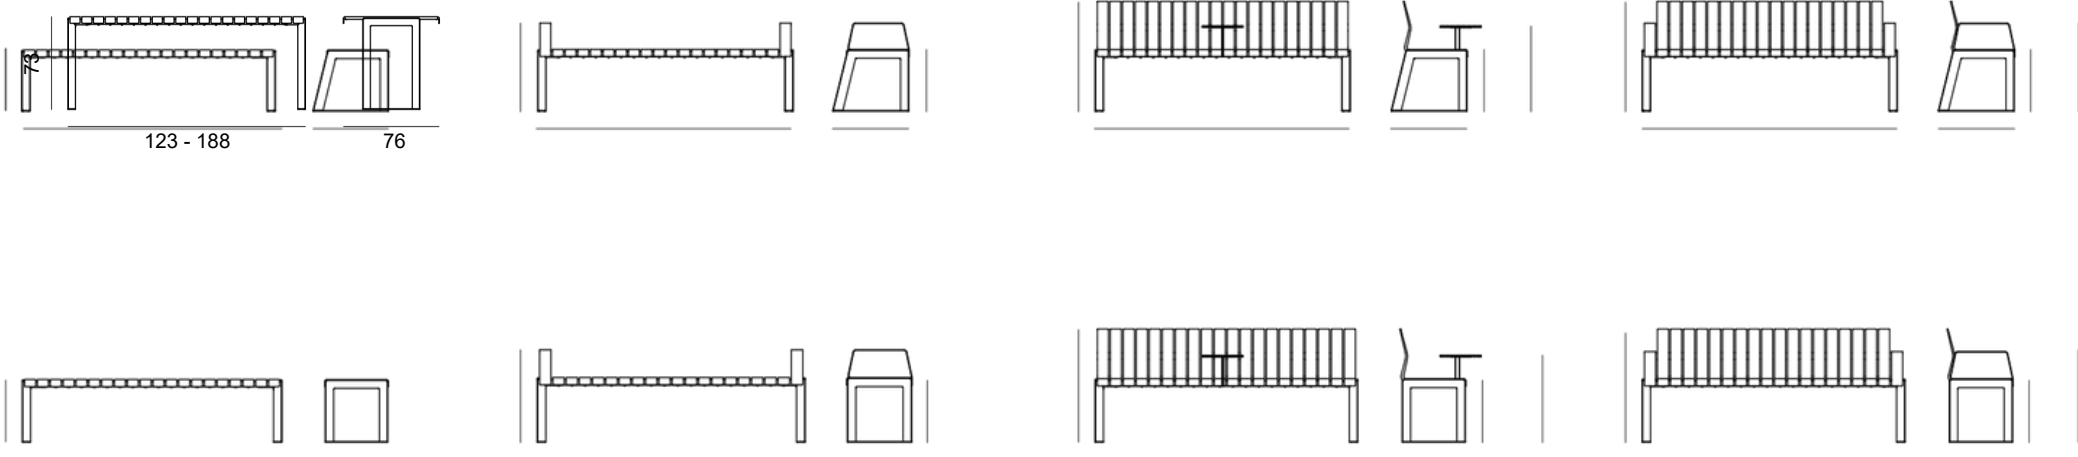

Liberty.080 Table

The Liberty.080 table module is available in two standard lengths: 120 cm (4-seater) and 190 cm (6-seater). However, custom lengths and depths are available upon request to meet specific requirements.

Constructed with extruded aluminum slats, Sendzimir galvanized steel sub-top supports, and galvanized sheet metal side panels, the entire structure is finished with polyester powder coating.

Designed for rapid assembly in just three steps, the table is engineered for ground anchoring and shipped flat- packed in compact packaging.

Liberty.080 Litter bin

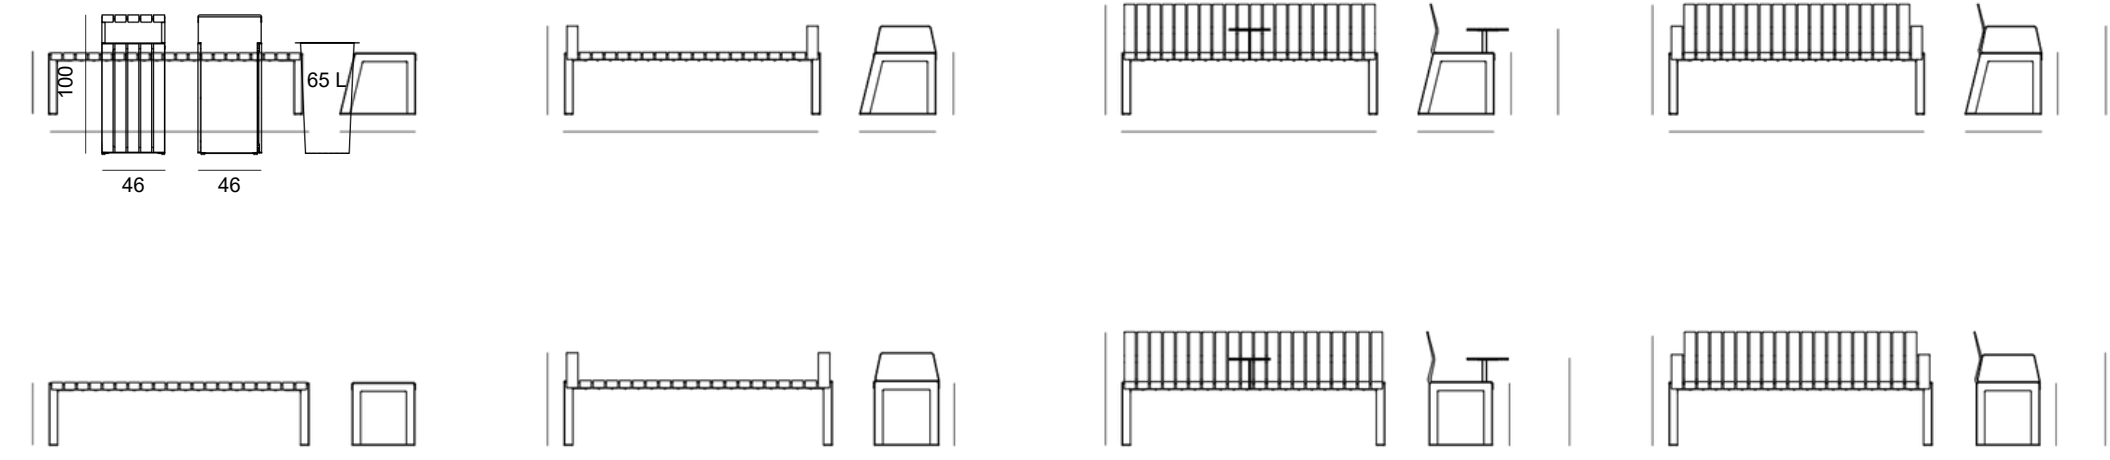

In perfect harmony with the collection's aesthetic, the litter bin combines style and functionality. The front-opening door is designed for quick and easy maintenance, while its spacious structure integrates naturally into any setting.

Liberty.080 Litter bin

The bin frame is constructed from Sendzimir galvanized steel tubing, with die-cast aluminum top slats and vertical slats in extruded aluminum. The entire structure is finished with polyester powder coating. Supplied fully assembled and equipped with a 65-liter internal liner, the bin is ready for ground anchoring. The front-opening door, secured by a practical lateral lock, ensures extremely quick and easy maintenance.
